Cryogenic Break-Junction Characterization of Single Organic Molecules

Thomas Grellmann

Schriften des Forschungszentrums Jülich
Reihe Schlüsseltechnologien / Key Technologies Band / Volume 98

ISSN 1866-1807 ISBN 978-3-95806-015-9

Contents

Abstract I

Zusammenfassung III

1 Introduction and Aims 1

2 Theoretical Background 5
2.1 Mechanically Controllable Break-Junction . . . 5
2.2 A Quantum Mechanical Approach . . . 7
2.3 Electron Tunneling Through a Potential Barrier . . . 7
2.4 Conductance Mechanisms of Single Molecules . . . 9
2.4.1 Simmons' Model . . . 9
2.4.2 Resonant Tunneling Model . . . 11
2.4.3 Summary . . . 14

3 Sample Preparation and Experimental Setup 15
3.1 Cryogenic Break-Junction Sample Holder . . . 15
3.2 Electronic Setup . . . 16
3.3 Automation . . . 19
3.4 Sample Design and Preparation . . . 20
3.4.1 Preparation Steps . . . 20
3.4.2 Au Deposition . . . 23
3.4.3 Design of the Break-Junction . . . 26
3.5 Mounting the Sample . . . 27

4 Results and Discussion 31
4.1 Reference Measurements . . . 31
4.1.1 Conductance–Position Characteristics . . . 31
4.1.1.1 Attenuation Factor . . . 32
4.1.1.2 Histogram . . . 35
4.1.1.3 Contour Histogram . . . 37
4.1.2 Current–Voltage Characteristics . . . 40
4.2 Characterization of Molecules . . . 41
4.2.1 Characterization Methods . . . 41
4.2.1.1 Conductance–Position Characteristics . . . 41
4.2.1.2 Resonant Tunneling Model . . . 43
4.2.1.3 Fowler–Nordheim Plot . . . 43
4.2.1.4 Double Logarithmic Plot . . . 44
4.2.1.5 Derivatives of the IVC . . . 44
4.3 Hexanedithiol and Benzenedithiol . . . 46
4.4 Terphenyldithiol . . . 55
4.5 Porphyrines . . . 61

5 Summary 69

6 Danksagung 73
