

1. Presentations 3

G. Kaiser, N. Constantopoulos 5

Overview on the integrated project "Materials Research for Information Technology"

N. Esser, A. Krost, M. Kolodziejczyk, U. Resch, W. Richter, 7

J. Wasserfall, D.R.T. Zahn, E. Anastassakis, E. Liarokapis, Y.S. Raptis

Optical analysis of thin semiconductors layers

H. Richter, K. Schmalz, C.A. Londos 27

Estimation of carbon substitutional concentration in Czochralski-grown silicon by means of deep-level transient spectroscopy and infrared spectroscopy measurements

N. Flytzanis, A. Mistriotis 31

Structure and dynamics of Silicon cluster

A. Vomvas, J. Sotiropoulos, W. Fuhs 43

Light induced metastable defects in doped and undoped a-Si:H

J. Simitzis, G. Hinrichsen 47

New semiconductive materials based on polyphenylenes

P. Aloupogiannis, A. Travlos, C. Papastaikoudis, Ch. Hardtke, 63

Stress measurements of cobalt silicides films

A. Travlos, P. Aloupogiannis, E. Rokofyllou, C. Papastaikoudis 71

Rare Earth Silicides: Growth and characterization of thin films

K. Bethge, P. Misaelidis 79

Analysis of nitrogen in different materials

R. Zeller, N. Stefanou, P.H. Dederichs 89

Multiple-scattering electronic-structure calculations for metallic systems

K. Kehr, P. Argyrakis 101

Trapping without traps by correlated random walks

H. Metz, W. Windsch, N. Gouskos 111

EPR investigations on perovskite ceramics

A. Naoumidis , P. Nikolopoulos, S. Agathopoulos 123

Wettability, interfacial energies and reaction products in SiC-liquid metal systems

2. Conclusions and Recommendations 135

3. List and Addresses of Participants 137
