

R. Isermann

Estimation of physical parameters for dynamic processes with application to 1
an industrial robot

S. Saksida. F. Bremsak 7

Neural networks in control systems

D. Juricic 11

Model based control of the Kappa number in the pulp cooking process 11

I. Skrjanc. D. Matko. A. Schumann 15

Presentation of two optimal controllers

J. Kocijan. R. Karba 19

An approach to robust multivariable combustion control design.

M. Atanasijevic. R. Karba. B. Zupancic. F. Bremsak

Modelling and simulation of dynamic behaviour of industrial continuous 23
distillation column

A. Schumann. D. Matko. B. Zupancic 27

Simulation of a diesel engine using a digital simulation language

D. Pfannstiel. J. Cretnik 31

In circuit simulation of industrial processes with personal computers.

N. Hvala. S. Strmcnik. J. Cernetic 35

Scheduling of batch chemical reactors on parallel production lines

M. Jekl. B. Zupancic. D. Matko. Z. Sehic 43

The role of analog simulation in the hybrid simulation system.

M. Sega

A view to the selection of CACE tools. 47

Z. Sehic. B. Zupancic. M. Jekl 51

An example of library for graphics aid in CACSD tools
