

1. Comparative identification of diamond -diamond / diamondlike materials.	1
1.1 Diamond -what is it?	1
1.2 What are "diamond coatings"	3
1.3 What are "diamondlike coatings"	3
1.4 Diamond coatings / diamondlike coatings diversity	3
2. Diamond coatings processing	5
2.1 Fundamental principles and CVD phenomenology at diamond processing	5
2.1.1 Thermodynamic approach	6
2.1.1.1 C-H-O ternary diagram construction	6
2.1.2 Search for the explanation of the mechanism of nucleation and growth of diamond CVD	8
2.1.3 Chemical kinetics concepts -search for the process rate controlling step	11
2.1.4 Crucials in diamond CVD	12
2.1.4.1 The role of hydrogen	12
2.1.4.2 Gas flow phenomena in diamond CVD	13
2.1.4.3 Role of heat transfer in diamond CVD	14
2.2 Different methods/techniques in diamond CVD	14
2.3 Progress in diamond CVD methods	16
2.3.1 Overview on our experimental results and considerations in the field of HFCVD of diamond	17
2.3.2 Other recent contributions to diamond CVD	30
3. Diamondlike coatings -main concepts, properties, processing routes	34
3.1 Classification of DLC phases	34
3.2 Main properties of DLC materials	34
3.3 DLC structure	36
3.4 Proposed mechanisms of DLC formation	37
3.5 DLC processing routes	38
4. Diamond and diamondlike materials applications, status and potentials	43
