

Preface	7
Abstract	8
1 Introduction	9
2 Tobacco Plantation	10
2.1 Soil and Growing Conditions	10
2.1.1 Flue Cured Tobacco	11
2.1.2 Oriental Tobacco	12
2.1.3 Burley Tobacco	12
2.2 Plantation Areas in Greece	12
2.2.1 Thessaloniki-Soxos and Karditza-Mitropoli	13
2.2.2 Thessaloniki-Plati	14
2.2.3 Komotini and Kozani-Chirolimni	14
2.2.4 Katerini-Vrias/N.Efessos	15
2.2.5 Agrinion-Sfina	16
3 Tobacco Quality	17
3.1 Outer and Inner Quality	17
3.2 Regulations of the European Union	18
3.3 Methods	18
3.3.1 Nitrate	19
3.3.2 Carbon Monoxide	19
3.3.3 Nitrogen Oxides	19
4 Greek Tobacco Breeding Lines	22
4.1 Breeding Line 5/R	22
4.2 Breeding Line 4N	25
4.3 Breeding Line 1/B	28
4.4 Breeding Line 2/K	31
4.5 Breeding Line 3/S	31
4.6 Discussing the Results	31
5. German Tobacco Cultivars	34
5.1 Geudertheimer	34
5.2 Burley	35
5.3 The Effects of Nitrogen-Fertilization	37
5.3.1 Condensate	37
5.3.2 Nicotine	39
5.3.3 Carbon Monoxide	40
5.3.4 Nitric Oxide	41
5.3.5 Nitrate	43
5.3.6 Nicotine and Nornicotine	43
5.4 Discussing the Results	43
6 Tobacco Breeding	44
6.1 Identification of Tobacco Varieties	45
6.2 Secondary Plant Compounds of Content	45
6.3 Isoenzymes and Alloenzymes	45
6.4 Methods	46
6.4.1 Protein Extraction Procedures	46
6.4.2 Electrophoresis Procedure	47

6.4.3 Isoelectric Focusing Procedure	48
6.4.4 Protein and Enzyme Staining Techniques	48
6.4.5 Documentation	49
6.5 Results and Discussion	50
6.5.1 Tobacco Seed	50
6.5.2 Green Leaf	50
6.5.3 Dry Tobacco	52
7 Conclusion	53
EXPERIMENTAL	57
8 Nitric Oxide Analysis	57
8.1 BAT Nitric Oxide Analyzer in Combination with Smoking Machine Filtrona SM 302	57
8.1.1 Additional Equipment required	57
8.1.2 Setting Up and Calibration Instructions	57
8.1.3 Smoking Procedure	58
8.2 Monitor Labs. Nitrogen Oxides Analyzer 8440E in Combination with Smoking Machine Borgwaldt RM 20 CS and Automatically Working Nitrogen Flushing Unit	59
8.2.1 Additional Equipment required	59
8.2.2 Setting Up and Calibration	60
8.2.3 Smoking Procedure	60
9 Electrophoresis	
9.1 Protein and Enzyme Extraction	61
9.1.1 Equipment	61
9.1.2 Buffers	61
9.1.3 Reagents	62
9.1.4 Staining Salts	62
9.1.5 Sample Preparation	62
9.1.6 Cleaning Procedure for the Dialysis Tube	64
9.1.7 Rapid Determination of the Protein Concentration	64
9.2 Vertical Polyacrylamide Slab Gel Electrophoresis	65
9.2.1 Equipment	65
9.2.2 Buffers	66
9.2.3 Reagents	66
9.2.4 Staining Salts	66
9.2.5 Stock Solutions	66
9.2.6 Simple Gels	68
9.2.7 SDS-Gradient Gels	69
9.2.8 Application of Samples	71
9.2.9 Operating the Electrophoresis	71
9.2.10 Removing the Gels	71
9.3 Isoelectric Focusing	72
9.3.1 Agarose Gels	72
9.3.2 Preparation of Solutions	72
9.3.3 Sample Preparation	73
9.3.4 Operating the Isoelectric Focusing	73
9.3.5 Staining of Samples	74
9.4 Protein and Enzyme Staining Procedures	75
9.4.1 Unspecific staining of proteins	75
9.4.2 Rapid Staining for Native Gels and IEF-Gels	76

9.4.3 Silver Staining	76
9.4.4. Destaining and Drying of Polyacrylamide Slab Gels	77
9.4.5 Specific Staining of Enzymes	77
9.5 Enzyme Staining Procedures of Agarose Gels	78
9.5.1 Chemicals	78
9.5.2 Preparation of Enzyme Buffers	78
9.5.3 Transfer Membrane Preparation Solutions :	79
9.5.4 Stain Solutions	79
9.5.5 Enzyme Staining	80
10 Summary	81
BIBLIOGRAPHY	83
