Table of Contents iii

D. Kolar and D. Suvorov

Editors Foreword vii

J Krawczynski

Text ix

M Komac

General Lines of Research Policy in Slovenja xi

F Thümmeler

The History of Slovene-German Cooperation in the Field of Materials Science and Development xv

Microscopy and Analysis

M Rühle

High-Resolution Transmission Electron Microscopy of Internal Interfaces 1

H. Mülleijans

Analytical Electron Microscopy of Internal Interfaces in Ceramics 9

M Ceh, H. Gu. A. Recnik, H. Mülleijans, and M Rühle

Quantitative EELS and EDS Analysis of Planar Faults in SrO-Doped CaTiO₃ 15

A. Recnik, J Bruley, W Mader, D. Kolar, and M Rühle

The Formation Mechanism of (111) Twins in Cubic Barium Titanate 21

G. Duscher, C. Gatts, H Mülleijans, and M Rühle

EEL Line Scans of Oxidised Silicon Bicrystals Analysed by Artificial Neural

Networks A. Recnik and W Mader

Structure of Inversion Domain Boundaries in Sb₂O₃-Doped ZnO 31

A. Loewe, M Trontelj, and W Mader

TEM Study of the Growth of Inversion Domains in Doped ZnO 35

R. A. Schwarzer, K Kunze, and S. Zaefferer

The Determination of Microscale Crystal Texture 41

A. Zalar, S. Hofmann, F Pimentel, and P Panjan

Interfacial Reactions in Thin-Film Structures 47

Danjca Hanzel, Darko Hanzel, W Meisel, and P Gütlich

Mössbauer Studies of Thermally Treated Vivianite and Some La-Ti-Fe Oxides 5.3

Darko Hanzel, Danica Hanzel, W Meisel, and P Gütlich

Physico-Chemical Properties of FeTi and FeTiN Thin Layers 59

Impedance Spectroscopy

A. Meden and S. Pejovnik

Structures of Low-Temperature Materials in Li-B System 71

J. Jamnik, J. Maier; and S. Pejovnik

Space Charge Regions in Solid Ionic Conductors 77

J. Fleig and J. Maier

Impedance Measurements of AgCl Surfaces using Microelectrodes 81

M. Gaberscek and S. Pejovnik

Impedance Studies of Passive Films 87

Modelling in Materials Science

H. E. Exner

Trends of Modelling in Materials Science 91

U. Kunaver and M. Lienkamp

Monte Carlo Simulation of Unidirectional Fibre Composite Failure 93

S. Hartmann, F. Mücklich, and G. Petzow

Microstructural Modelling of Silicon Nitride Ceramics 99

Solid Oxide Fuel Cells

A. Naoumidis

Material Development for Solid Oxide Fuel Cells 105

M. Hrovat, A. Gupta, J. Holc, D. Kuscel; A. Naoumidis, and D. Kolar

Preliminary Results on Thick Film Electrodes for Solid Oxide Fuel Cells 111

Non-Oxide Ceramics

A. Pohl, M. J. Hoffmann, and F. Aldinger

Wetting Behaviour of Silicon Nitride by Silicate Melts 117

M. Hammel; M. J. Hoffmann, and H. Kem

Densification Behaviour and Microstructural Development of ZrO₂-Containing Silicon Nitride Ceramics 123

A. Krell

Submicron Sintered Alumina Competing With Hot-Isostatically Pressed TiC-Strengthened Composites 129

Magnetic Materials

B. Reinsch and G. Petzow

Phase Equilibria of Interstitially Modified Permanent Magnets 133

S. Kobe Besenical; B. Saje, and G. Drazic

Use of the HDDR Process in Preparation of Zirconia Doped Nd-Dy-Fe-B High Coercivity Powder 139

B. Saje, B. Reinsch, S. Kobe-Besenical; D. Kolar; and I. R. Harris

Nitrogenation of Ta Modified Sm₂Fe₁₇ Alloy 145

P. A. P. Wendhausen, A. Handstein, D. Eckert, and K-H. Müller
Sm₂Fel₇N_x Magnets Prepared by HDDR Processes 151

Coatings

B. Navinsek

New Trends in PVD Metallurgical Coatings 157

J-M Abels and H.-H. Strehblow

A Mobile Transfer System for Surface Analytical Applications , 165

I. Milosev H.-H Strehblow, and B. Navinsek

Oxidation of Hard PVD Coatings Investigated by XPS., 171

A. Cvelbal; P. Panjan, B. Navinsek, and A. Zalar

A Continuous Electrical Resistivity Measurement in Thin Films 175

Metallurgy

P. Funke, R. Krengel, and R. Turk

Experimental-Numerical Study of Hot Strip Rolling 179

R. Turk, S. Spaic, T Rodic, and P. J. Funke

Physico-Metallurgical Effects on the Strength of the Compounds Al/MgSi-Cu with the Cold-Pressure Welding 187

T Rodic

Numerical Modeling and Computer Simulations of Metal Forming Operations 195

H. Fritze, J Jedlinski, G. Borchardt, V Nardin, and R. Turk

High Temperature Oxidation Behaviour of Si/SiC Coated C/C Composites in Air 199

K Koch and C. Roth

Cold Model Investigation of Flows, Mixing and Materials Transport in Metallurgical Reactors 205

J Ren, M Petel; and K. Koch

Foaming of Iron-Oxide Containing Slags in Metallurgical Processes of the Iron and Steel Production 211

E. Korte, K Koch, and J Lamut

Water-Air Model Investigation of the Continuous Decarburisation of the Fe-C Melts 215

K U: Kainer; u: Roos, and B. L. Mordike

Platelet-Reinforced Magnesium Alloys 219

Building Materials

M Maultzsch, D. Dimic, and J Suput

Effect of Admixtures on the Sulphate Resistance of Concrete 225

J Suput, M Maultzsch, and D. Dimic

The Effect of Added Polymers and Cement Type on the Durability of Mortar Used for Concrete Repair 231

F Knez, M Zupan, and S. Herkel

Integration of Transparent Thermal Insulation in Prefabricated Light Weight Buildings 235

Materials and Technologies

J: Kosmac

Recent Trends in Low Pressure Injection Moulding (LPIM) 239

S. Walter; D. Suttor; and P. Greil

Injection Moulding of Polysiloxane/Filler Mixtures 245

R. Dirscherl and N Claussen

Principles and Processing of Reaction Bonded Al₂O₃ (RBAO) and Related Technology 251

M Sajko. R. Dirscherl, J: Kosmac. and S. Novak

Low Pressure Injection Moulding of Reaction Bonded Al₂O₃ (RBAO) Ceramics 257
