

M. Agranovski	1
Radon transforms on real quadrics and holomorphic PDE	
R. Greiner	3
Generalized Jackson kernels in approximation theory	
W. Kratz	9
Quadratic functionals: Positivity, oscillation, Rayleigh's principle	
S.L. Krushkal	19
On quasiconformal mirrors	
H. Lanzinger, U. Stadtmüller	23
Maxima of increments of partial sums for certain subexponential distributions	
E. Liflyand	41
Integrability of trigonometric series and Fourier transforms	
F. Moricz	55
Approximation by rectangular partial sums of double conjugate series	
HA. Runckel	75
Zeros of functions associated to analytic continued fractions	
St. Ruscheweyh	77
Viectoris' theorem: A complex view	
J. Schiff	81
Symplectic integrators from discretized action principles	
St. Shnider, M. Markl	85
Differential operator endomorphisms of an Euler-Lagrange complex	
M. Teicher	113
Open questions on fundamental groups of complements of curves	
Program	117
Participants	121
