

CONTENTS

I. INTRODUCTION

1 Introduction to the IEA Advanced Fuel Cells Programme 1 -1 *B. Höhlejn:*
Introduction to Annex X: 'Fuel Cells for Transportation' 1 -3

II. FUEL CELL ELECTRICAL VEHICLES

2 *F. Gossen, J. w. Bjennann:*

Comparison of fuel cell systems and other future powertrains concerning 2 -1
energy efficiency

3 *A. Wjartalla, St. pjschjnger:*

Future Development Trends for Intema1 Combustion Engines 3 -1

4 *R. Matthe:*

Electric vehic1es powered by fuel cell at GM/Ope1- a globa1 project 4- 1

5 *P. Schmjtz, B. Bates, R.I. Sjms:*

Ford's fuel cell activities 5- 1

6 *J. Grosse:*

PEM-Fue1 Cells 6 -1

7 *A. Könjg:*

CAPRI -Project 7 -1

8 *G. Frjedlmejer, J. Frjedrjch, F. Panjk, W. Wejss:*

First Experiences with Fuel Cell Demonstration Vehic1es 8- 1

9 *W. Schütz:*

Hydrogen storage in carbon nano-fibers 9 -1

10 *A. Röder:*

Fue1 cell cars and platinum-group meta1s -Influence on the Life Cyc1e 10- 1
Ba1ance

11 *R.T.M. Smokers, S. Mourad, E. v.d. Tjllaart, D. Schmal:*

Assessment of the energy consumption of conventiona1 and fue1 cell 11 -1
passenger cars

12 *R.T.M. Smokers, S. Mourad, E. v.d. Tillaart, D. Schmal:*

Assessment of the energy consumption of urban buses with conventiona1 12 -1
and fue1 cell power trains

13 *D. Schmal:*

Fue1 cells in Water Transportation 13- 1

III. FUEL SUPPLY SYSTEMS

14 *A. Huber, M. Altmann:*

Hydrogen production costs for fuel cell vehicle applications 14- 1

15 *M. Edel:*

Fuel Supply Systems -Methanol 15 -1

16 *St. Unnasch:*

Local fuel cycle emissions from fuel cell powered vehicles 16 -1

IV. INTEGRATED SYSTEMS ANALYSIS

17 *R. Kolke:*

Fuel Cells in Transport and in Stationary Applications 17 -1

18 *G. Erdmann, M. Grahl:*

Competitiveness of fuel cell electric vehicles 18 -1

19 *G. Erdmann, M. Grahl, A. Röder:*

Fuel Chain Efficiencies 19 -1

20 *P. Ekdunge, M. Raberg-Hellsing:*

Analysis of the environmental impact of fuel cell vehicles 20 -1

21 *M. Walbeck, U. Birnbaum:*

Economic Efficiency and Market Introduction of Fuel Cell Vehicles 21 -1

22 *G. Erdmann, M. Grahl:*

Macroeconomics of fuel cell electric vehicles 22 -1

V. PERSPECTIVES

23 *K. E. Noreikat:*

Future fuel cell development 23 -1

24 *B. Höhle, P. Biedermann, Th. Grube, R. Menzer:*

Comparison of studies fuel cell powered vehicle propulsion systems 24 -1

VI. LITERATURE

25 *M. Grahl:*

Literature 25 -1
