1	Introduction	1
2	Basic Physics of ERO-TEXTOR	2
2.1	Fokker-Planck Equation	2
2.2	Relaxation Times	5
2.3	Thermal Forces	7
2.4	Equations of motion	7
2.5	Background Plasma and Scrape Off Layer Geometry	8
2.5.1	Geometric Parameters	9
2.5.2	Plasma Parameters	10
2.6	Particle Generation and Plasma Surface Interaction	19
2.6.1	Sputtered Particles	19
2.6.2	Thermal Particles	21
2.6.3	Reflected Particles	22
2.6.4	External sources	22
2.6.5	Plasma Surface Interaction	24
3	Formatted Input-Files	28
3.1	Configuration File	28
3.2	Ionization Rates	30
3.2.1	Ionization Rates For Atomic Species	30
3.2.2	Ionization Rates For Molecular Species	31
3.3	Sputtering Data	34
3.3.1	Data for Simulation Particles	34
3.3.2	Data for the background plasma	35
3.4	Reflection Data	35
3.5	Parameter File Composing Individual Run	38
3.5.1	Data For Numeric Dialog	38
3.5.2	Background Plasma Data	40
3.5.3	Limiter/Divertor Geometry	46
3.5.4	External Source	47
3.5.5	Chemical Data for External Source	52
3.5.6	Marker Data	53
3.5.7	Surface Net on Limiter/Divertor	55
3.5.8	Volume Net for Spectroscopy	56
3.5.9	Species to be traced by Spectroscopy	58
3.5.10	Number of Time steps & Time per Step	59
4	Formatted Output Files	60
4.1	Surface Related Output Files	61
4.1.1	Temporary Files	62
4.2	Spectroscopy Related Output Files	62

5	Data-Structures and ERO-TEXTOR-Routines	64
5.1	Building In New Elements	64
5.2	Data-Structures	66
5.2.1	Particle-Structures	66
5.2.2	Plasma-Structures	67
5.2.3	Material-Structures	71
5.2.4	Limiter-Structures	73
5.2.5	Structures for Surface Data	74
5.2.6	Structures for Spectroscopy	76
5.2.7	Handling-Structures	77
5.3	Flow Diagrams	78
5.4	ERO-TEXTOR-Routines	85
5.4.1	Major Routines	85
5.4.2	Sub-Routines	93
A	Rate Coefficients for Silane	108
A.1	Fitting of the cross sections	110
A.2	Fit Parameters of the reaction rates	110
B	Rate Coefficients for Molybdenum and Tungsten	117
B.1	Calculating the rate coefficients $\langle \sigma \cdot v \rangle$	117
B.2	Rate Coefficients for Molybdenum	118
B.3	Rate Coefficients for Tungsten	118
C	Calculated Sputtering Yields	119
D	Organisation of C-Files and Databases	150
D.1	Index of C-Files, Header-and Make-Files	150
D.2	Index of Supplied Sputtering Data	153
D.3	Index of Supplied Integral Sputtering Yield Data	153
D.4	Index of Supplied Reflection Data	154
D.5	Index of Supplied Ionization Rate Coefficients	154
E	Final Remarks	155
E.0.1	Physical Information	155
E.0.2	Error Handling & Runtime Errors	155
E.0.3	Numerical Information	155
	Bibliography	157
