|----------|---------------------------------------------------------------------------------|-----------|
| <b>1</b> | <b>Introduction</b>                                                             | <b>5</b>  |
| <b>2</b> | <b>Photoemission</b>                                                            | <b>7</b>  |
| 2.1      | Single-particle picture of photoemission . . . . .                              | 7         |
| 2.1.1    | Three-step model of photoemission . . . . .                                     | 8         |
| 2.1.2    | Symmetry and selection rules . . . . .                                          | 10        |
| 2.1.3    | Surface states . . . . .                                                        | 11        |
| 2.2      | Beyond the single particle picture . . . . .                                    | 11        |
| 2.3      | Spin-resolved photoemission . . . . .                                           | 11        |
| 2.4      | Experimental Setup . . . . .                                                    | 12        |
| <b>3</b> | <b>Electronic structure and magnetism of fcc(100) Fe, Co, and Ni</b>            | <b>15</b> |
| 3.1      | Introduction . . . . .                                                          | 15        |
| 3.2      | Fcc Co(100) . . . . .                                                           | 18        |
| 3.2.1    | Exchange splitting in fcc Co . . . . .                                          | 18        |
| 3.2.2    | Bulk electronic structure of fcc Co(100) films on Cu . . . . .                  | 19        |
| 3.3      | Fcc Ni(100) . . . . .                                                           | 23        |
| 3.3.1    | Spin-dependent electronic structure of fcc Ni . . . . .                         | 23        |
| 3.3.2    | Bulk and surface states of fcc Ni(100) films on Cu . . . . .                    | 26        |
| 3.4      | Fcc Fe(100) films: Bulk and surface electronic and magnetic structure . . . . . | 34        |
| 3.5      | Magnetic phases of thin fcc Fe films . . . . .                                  | 39        |
| 3.5.1    | Fe/Co(100) . . . . .                                                            | 39        |
| 3.5.2    | Fe/Cu(100) . . . . .                                                            | 44        |
| 3.5.3    | Fe/Ni(100) . . . . .                                                            | 45        |
| 3.6      | High-spin fcc Fe . . . . .                                                      | 50        |
| 3.7      | Second fcc Fe phase . . . . .                                                   | 56        |
| 3.7.1    | First vs. second fcc Fe phase: Changes in the electronic structure . . . . .    | 56        |
| 3.7.2    | Comparison with <i>ab initio</i> bulk band structure calculations . . . . .     | 68        |
| 3.7.3    | Comparison with <i>ab initio</i> slab calculations . . . . .                    | 71        |
| 3.8      | Summary . . . . .                                                               | 82        |
| <b>4</b> | <b>Quantum Well States in Cu(100)</b>                                           | <b>85</b> |
| 4.1      | Introduction . . . . .                                                          | 85        |
| 4.2      | Quantum well states in Cu thin films on Co(100) . . . . .                       | 89        |
| 4.2.1    | Dispersion of QW states . . . . .                                               | 89        |
| 4.2.2    | Roughness . . . . .                                                             | 97        |
| 4.2.3    | Spin-polarization of QW states . . . . .                                        | 101       |

|          |                                                                        |            |
|----------|------------------------------------------------------------------------|------------|
| 4.3      | Relation between oscillatory coupling and QW states . . . . .          | 106        |
| 4.4      | Comparison between QW states in Cu on Fe(100), Co(100) and Ni(100) . . | 108        |
| 4.4.1    | Period . . . . .                                                       | 109        |
| 4.4.2    | Intensity . . . . .                                                    | 109        |
| 4.4.3    | Spin . . . . .                                                         | 112        |
| 4.4.4    | Phase . . . . .                                                        | 115        |
| 4.5      | Dispersion with $k_{\parallel}$ . . . . .                              | 125        |
| 4.6      | Double quantum well systems . . . . .                                  | 129        |
| 4.7      | d-QW states . . . . .                                                  | 132        |
| 4.8      | Short periodic QW states . . . . .                                     | 140        |
| 4.9      | Summary . . . . .                                                      | 147        |
| <b>5</b> | <b>Summary</b>                                                         | <b>149</b> |
|          | <b>Bibliography</b>                                                    | <b>151</b> |
