ACKNOWLEDGEMENTS
ABSTRACT
CHAPTER I: Introduction 1
CHAPTER II: Geological Setting. 26
1.The Migif-Hafafit gneisses and associated rocks. 27
1.1. The ultramafic rocks 27
1.2. The foliated metagabbros 33
1.3. The biotite schists 44
1.4. The psammitic gneisses.. 52
1.5. The gneissic tonalite 61
2. The low grade metamorphic rocks and associated granitoids. 71
2.1. The serpentinites 71
2.2. The metavolcanic rocks 72
2.3. The gneissic quartz diorite 77
2.4. The porphyritic granodiorite 80
3. Veins and dykes 82
CHAPTER III: Petrography. 84
1. The Migif-Hafafit gneisses and associated rocks. 84
1.1. The ultramafic rocks.. 84
1.2. The foliated metagabbros 92
1.3. The biotite schists 102
1.4. The psammitic gneisses 106
1.5. The gneissic tonalite 113
2. The low grade metamorphic rocks and associated granitoids 117
2.1. The serpentinites 117

2.2. The metavolcanic rocks 120
2.3. The gneissic quartz diorite. 127
2.4. The porphyritic granodiorite 128

CHAPTER IV. Geochemistry 132
Analytical techniques 133
1. The ultramafic rocks and the foliated metagabbros. 135
2. The psammitic gneisses and biotite schists171
3. The metavolcanic rocks 214
4. The granitoid rocks 239

CHAPTER V: Mineral Chemistry 282
1. Clinopyroxene 282
2. Garnet 287
3. Plagioclase 291
4. Amphibole 297
5. K-feldspar.. 300

CHAPTER VI: Structural Elements and Tectonic History 302

CHAPTER VII: Metamorphism 312

Summary and Conclusions. 326
