

Forschungszentrum Jülich GmbH
Institut für Werkstoffe und Verfahren der Energietechnik

Detlef Stolten and Bernd Emonts (Editors)

Technical Session:

Fuel Cell Systems

of the World Renewable Energy Congress VII

Proceedings

Schriften des Forschungszentrum Jülich
Reihe Energietechnik / Energy Technology Volume 26
ISSN 1433-5522 ISBN 3-89336-332-7

Contents

International Strategies

R Ahluwalia, J A Milliken*, F Wagner and J Kirschner**; Energetics, Incorporated; * U.S. Department of Energy; ** Argonne National Laboratory, Argonne, IL, USA
Hydrogen, Fuel Cells, and Infrastructure Technologies 3

N K Bansal, Centre of Energy Studies, India
Indian strategy for Fuel Cell Development 11

National Strategies

K Heinloth, University of Bonn, Germany
Innovative Fuels for Fuel Cells to Provide Electricity, Heat
and Mobility resp. Transportation 21

G Isenberg, DaimlerChrysler AG, Research Centre Ulm, Germany
Report on DaimlerChrysler Fuel Cell and Energy strategy 29

K J Li, J Huijsmans*, K Bakke** and W Heiduk; Shell Global Solutions International, The Netherlands; * Shell Hydrogen; ** Shell Technology, Norway

The Role of High Efficiency Solide Oxide Fuel Cells in the Transition to a sustainable Energy supply 33

F Marscheider-Weidemann, E Schirrmeister and B Höhlele*; Fhl für Systemtechnik und Innovationsforschung, Karlsruhe, Germany; * Forschungszentrum Jülich, Germany

Possibilities of the Market Introduction of Mobile Fuel Cells and Effects on Industry- Component Analysis and Scenarios for Market Introduction 39

F Staudacher, Electrical Training Center Aalen, Germany
Fuel Cell Technologies -Further Education and Training Concept
for stationary and Mobile Fuel Cell Application 45

Fuel Cell Applications

B Höhlele, Th Grube, A Lokurlu and D Stolten, Forschungszentrum Jülich, Germany
Fuel Cells for Mobile and stationary Applications - Analysis of Options and Challanges 53

M Fübi and R Uttich, RWE Fuel Cells GmbH, Essen, Germany
Broad Public Demonstration of High and Low Temperature Fuel Cells ...67

M Meinhardt and G Cramer, SMA Regelsysteme, Germany
Integral Power Conditioner for Grid-connected Fuel Cell Systems 75

Fuel Processing

L Hartmann K. Lucka, H Köhne* and C. Mengel*; Oel-Wärme-Institut, Aachen, Germany;
* Energie- und Stofftransport, RWTH Aachen, Aachen, Germany
Multi-fuel Reformer for sOFC Technologies in stationary and Automotive Applications 83

A Heinzl, F Mahlendorf, J Mathiak and J Roes, University of Duisburg, Germany
Biofuels for Fuel Cells -Gas Purification and Gas Processing 89

J Pasel, C Palm, P Cremer, R Peters and D Stolten, Forschungszentrum Jülich, Germany
Hydrogen Prodution via the Autothermal Reforming of Diesel Fuel 107

U Zuberbühler, M Specht, D West and A Bandi, Centre for Solar Energy and Hydrogen Research, Stuttgart, Germany
Renewable Fuels -Resources, synthesis and Utilisation 117

Components and Manufacturing

P Bogdanoff, M Hilgendorff, H Schulenburg, M Fieber-Erdmann*, I Dorbandt, H Tributsch and S. Fiechter;
Hahn-Meitner-Institut-Berlin, Germany; *BESSY, Berlin, Germany
Noble metal Free Catalysis for Oxigen Redudion in PEM Fuel Cells 129

V Gogel, Th Frey, K A Friedrich, L Jörissen and J Garche, ZSW, Ulm, Germany
Investigation of the Influence of the Electrode strudure on the Performance of Direct Methanol Fuel Cells 133

G Mantzouridis, Coatema Coating Machinery, Dormagen, Germany
Energy Concepts for the Future and Coating Technologies for Fuel Cells 143

Modelling and Simulation

P Lunghi and S Ubertini*; University of Perugia, Italy; * University of Rome, Italy
An Effedive and Reliable Method for Single Fuel Cells Experimental Testing and Comparison of Results: Test Parameterisation and Procedure Definition 149

A Müller, J Hohe, W Becker, D Stolten*, L G J de Haart* and R W Steinbrech*; University of Siegen, Germany;
Forschungszentrum Jülich, Germany
Simulation and Modelling: Discovering the Potential for structural Optimization of Fuel Cell Stacks 163

W Rehm and B L Wang, Forschungszentrum Jülich, Germany
Fire Protection and Explosion Prevention for Hydrogen safety Technology 169

Poster Contributions

J C Bringmann, B Emonts, H Janßen and D Stolten, Forschungszentrum Jülich, Germany
Analysis of the Process Advantages and Application Fields for Alkaline High-Pressure Electrolysis 177

C Mengel, H Köhne, K Lucka and L. Hartmann; RWTH Aachen, Germany; Oel-Wärme-Institut, Herzogenrath, Germany
Multi-Fuel Premixing for Liquid Hydrocarbons Applicable for e.g. Famer Fatty Acidsr IGO and Mixtures 187

J Scherer, M Loster, K A Friedrich, LJörissen and J Garche, ZSW, Ulm, Germany studies on the Adivity and stability of Colloid-Based Catalysts in Polymer Eledrolyte Fuel Cells 193

M Pokojski, Bewag AG, Berlin, Germany The First 250 kW PEM Fuel Cell in Europe - InitialOperating Experiences 207

P C Ghosh, B Emonts and D Stolten, Forschungszentrum Jülich, Germany
Cost Effective site selection for a Renewable Energy System with Hydrogen as Long Term Storage 217

M Hilgendorff, P Bogdanoff, M Bron, I Dorbandtr H Tributsch and S Fiechter, Hahn-Meitner-Institut, Berlin, Germany
Preparation. strudure and Performance of Ru.Based Oxygen Redudion Catalysts in PEM Fuel Cells 227

B Groß, K Kimmerle and H Altgeld, IZES, Saarbrücken, Germany A Fuel Cell Workshop for Saarland's suppliers: Our Goals Compared to our Results 231

P Lunghi and R Burzacca, University of Perugia, Italy
An Effedive and Reliable Method for Single Fuel Cells Experimental Testing and Comparison of Results: Advanced Control Techniques 235
