

Proceedings of the 1st Summer School 2002 and Workshop on COSY Physics

Summerschool

- P. V.Pancella, Storage Ring Experiments 1
- J. Haidenbauer, Meson-Exchange Models 19
- D. O. Riska, Nucleon Resonance Structure. 41
- R. Maier, Injectors/Linacs and Phase-Space Cooling 65
- G. H. Hoffstaetter, Accelerator Rings wit Polarized Beams and Spin Manipulation 85

Workshop

- N. N. Achasov, Investigation of Light Scalar Resonances at COSY 127
- P. D. Eversheim, The TRIC Experiment: A P-Even Time-Reversal Invariance Test at COSY 135
- P. Lenisa, Study of Heavy Meson Production with a Polarized Internal Target 141
- K.Tanida, Possibility of Hypernuclear Physics at COSY 147
- J. Ritman, Considerations of a "4 π " Detector at COSY 155
- V. Barychevski, Oscillation and Rotation of Deuteron Spins in Polarized and Unpolarized Targets 165
- E.Tomasi-Gustafsson, Polarization Phenomena for Meson Production in NN Collisions Near Threshold 179
- U. Wiedner, Hadron Spectroscopy with 4 π Detector Design 185
- H. Huang, Polarized Beam Acceleration and Spin Manipulation in Medium-energy Synchrotrons 193
- H.-P. Morsch, Baryon Resonances 201
- M. Steck, High Energy Electron Cooling 207
