

Contents

Abbreviations	VII
1 Introduction	1
1.1 Objectives and Concept	1
2 Theoretical Background	3
2.1 The Components of the Immune System	3
2.2 Concepts in Immunology	6
2.2.1 The Adaptive Immune Response	6
2.2.2 Dendritic Cells	10
2.2.3 The T-helper Cell Pathway	13
2.2.4 Effector Functions of the Immune System	17
2.3 Cancer Immunotherapy	17
2.3.1 Dendritic Cell Vaccines in Cancer Treatment	17
2.3.2 MUC1: A Tumor Associated Antigen in Breast Cancer	20
2.4 Generation of Dendritic Cells	22
3 Material and Methods	27
3.1 Solutions	27
3.2 Lysate from Human Breast Carcinoma Cell Lines	28
3.2.1 Cultivation of Human Tumor Cell Lines	28
3.2.2 Preparation of Tumor Cell Lysate	29
3.3 Immunoblotting of Prepared Lysate	29
3.3.1 Lysate Preparation	29
3.3.2 Denaturing Electrophoresis	30
3.3.3 Blotting and Detection	31

3.4	Generation of Dendritic Cells	32
3.4.1	Isolation of CD14 ⁺ cells	32
3.4.2	Processing of Plasma	34
3.4.3	Differentiation of Monocytes to Dendritic Cells	34
3.4.4	Maturation of Dendritic Cells	34
3.4.5	Cryopreservation	35
3.5	Analytics of Cell Parameter	36
3.5.1	Cell Counting and Viability	36
3.5.2	Flow Cytometric Analysis	36
3.5.3	Apoptosis Analysis	37
3.5.4	Cytospin	39
3.5.5	Scanning Electron Microscopy	40
3.6	Immunobiological Analysis	40
3.6.1	Analysis of Endocytosis	40
3.6.2	Migration of Dendritic Cells	41
3.6.3	Allogeneic T Cell Response	41
3.6.4	Synthetic Peptides	42
3.6.5	MHC Class I Restricted T Cell Response	42
3.6.6	Stimulation of Autologous T Cells with Tumor Lysate-pulsed Dendritic Cells	43
3.6.7	Tetramer Staining	44
3.7	Cytokine Analysis	44
3.7.1	The Cytometric Bead Array	44
3.7.2	Enzyme Linked Immunosorbent Assay	47
3.7.3	Interferon- γ Secretion Assay	47
3.8	Analysis of Medium Components	47
4	Results	49
4.1	The Generation of Dendritic Cells	49
4.1.1	Cell Enrichment and Starting Population of Monocytes	49
4.1.2	Cytokine Kinetics	53
4.1.3	Influence of Different Cell Densities on Yield and Maturation of DCs . . .	53

<i>CONTENTS</i>	V
4.1.4 Optimization of GM-CSF and IL-4 Concentrations	61
4.1.5 The Influence of Different Maturation Stimuli	64
4.1.6 Mixed Leukocyte Reaction	65
4.1.7 Generation of Dendritic Cells with Optimized Parameters	67
4.2 Apoptosis of Monocytes	70
4.3 Induction of MUC1 Specific T Lymphocytes	75
4.3.1 Evaluation of Breast Carcinoma Cell Lysates	76
4.3.2 Immature DCs Efficiently Take Up Antigen	78
4.3.3 Adjuvant Induced Maturation of Lysate-pulsed Dendritic Cells	80
4.3.4 Migratory Capacity of Lysate-pulsed Dendritic Cells	83
4.3.5 Cryopreservation of Dendritic Cells	84
4.3.6 Matured DCs Induce MHC Class I Restricted T Cell Responses	88
4.3.7 Autologous T Cell Response to Lysate-pulsed Dendritic Cells	96
4.4 Transfer to Clinical Application	104
4.4.1 Cultivation of Dendritic Cells in a Fully Closed System	104
4.4.2 Dendritic Cells from Breast Cancer Patients	108
5 Discussion	111
5.1 The Generation of Dendritic Cells: Clinical Applicability	111
5.2 Apoptosis of Monocytes	116
5.3 Induction of MUC1 Specific T Lymphocytes	119
5.4 Final Observation	123
6 Summary	125
7 Outlook	127
A Mathematical Calculations	XXV
B Patient Information Sheet	XXVII
List of Figures	XXXVII
List of Tables	XXXIX
Bibliography	XLI
