

# Contents

<b>Introduction</b>	<b>vii</b>
<b>I Theory</b>	<b>1</b>
<b>1 The ferroelectric thickness limit</b>	<b>3</b>
1.1 Piezoelectricity . . . . .	3
1.2 Ferroelectricity . . . . .	5
1.3 Electrical boundary conditions . . . . .	16
1.4 Mechanical boundary conditions . . . . .	20
<b>2 Quantum-mechanical tunneling</b>	<b>27</b>
2.1 Tunneling effect . . . . .	27
2.2 Elastic and inelastic electron tunneling . . . . .	30
<b>3 Concept of a Ferroelectric Tunnel Junction</b>	<b>35</b>
3.1 Piezoelectricity and tunneling . . . . .	36
3.2 Ferroelectricity and tunneling . . . . .	42
<b>4 Heteroepitaxy of oxide perovskites</b>	<b>49</b>
4.1 Material systems . . . . .	49
4.2 Deposition techniques . . . . .	55
<b>5 Characterization techniques</b>	<b>61</b>
5.1 Structural characterization . . . . .	61
5.2 Electrical characterization . . . . .	68
<b>II Experimental results</b>	<b>71</b>
<b>6 Structural properties</b>	<b>73</b>
6.1 Pulsed-laser-deposited $(Ba, Sr)TiO_3$ thin films . . . . .	73
6.2 Molecular beam epitaxy of $SrRuO_3$ and $BaTiO_3$ thin films . .	76

6.3 High-pressure sputtered $SrRuO_3$ and $Pb(Zr,Ti)O_3$ thin films	89
<b>7 Ferroelectric properties</b>	<b>97</b>
7.1 Influence of different patterning methods . . . . .	98
7.2 Influence of boundary conditions . . . . .	101
7.3 Thickness dependence of ferroelectric properties . . . . .	107
<b>8 Current transport through ultrathin films</b>	<b>119</b>
8.1 Resistive switching effects in $I-V$ curves . . . . .	120
8.2 Current transport mechanisms . . . . .	124
8.3 Similar switching effects reported by other groups . . . . .	131
8.4 Final remarks on resistive switching and current transport mechanisms . . . . .	134
<b>Summary</b>	<b>139</b>
<b>Literaturverzeichnis</b>	<b>145</b>
