

Preface.....	III
Introduction.....	1
1 Examples of Success	3
1.1 Development and construction of a DMFC system for installation in an electric vehicle	4
1.2 Operation of a 5-kW SOFC stack	9
2 Education and Training	15
2.1 Fuel cell training and demonstration centre	16
2.2 Members of staff teaching at universities.....	23
3 Scientific and Technical Reports	27
3.1 Focus on polymer electrolyte fuel cells	28
3.2 Focus on solid oxide fuel cells	42
3.3 Fuel processing.....	52
3.4 Fuel cell process engineering	60
3.5 Physico-chemical fundamentals	70
3.6 Process and systems analysis.....	78
4 Selected R&D Projects	89
4.1 Durable PEFCs as a prerequisite for a hydrogen economy	90
4.2 Pilot operation of a solid oxide fuel cell (SOFC) with mine gas	93
4.3 APAWAGS – System for on-board power and water production based on fuel cell technology	98
5 Organization	105
5.1 The Institute for Energy Process Engineering (I WV-3).....	106
5.2 Overview of department competences	108
5.3 Site	110
5.4 List of abbreviations	113
