List of Figures	6
List of Tables	9
1 Abstract	13
2 Motivation	15
3 Theory of Wetting and Diffusion	19
3.1 Simple Theory of Wetting	19
3.1.1 Interfaces at Equilibrium	19
3.1.2 Wetting as a Dynamic Process	28
3.2 Diffusion	32
3.2.1 General Theory	32
3.2.2 Diffusion of Polymers	32
3.2.3 Solving the Diffusion Equation for an Axis-symmetric Drop with Constant Radius on a Thin Substrate	33
4 Introducing a Bio-compatible System	37
4.1 Bio-compatibility as a Goal in Wetting Studies	37
4.2 Identifying a PDMS-based System for Studying Wetting Under Water	38
4.3 Properties of Fluid PDMS	39
4.4 A Substrate of Cross-linked PDMS	41
4.5 Preparation of the Substrate	42
4.6 Characterization of the Substrate	44
4.7 Method of Drop Deposition	51

5	RICM - a Valuable Tool for Wetting Studies	53
5.1	Introduction	53
5.2	Reflection Interference	54
5.3	Antiflex Technique	54
5.4	Image Formation	56
5.4.1	Coherence and Resolution	57
5.4.2	Methods of Height Profile Reconstruction	66
5.5	Drop Shape Reconstruction	69
5.5.1	Drop Shape Reconstruction Using Simple Theory	69
5.5.2	The Problem of the Missing Extrema	71
5.5.3	Calculation of Non-Local Correction Factors for the Used Setup	74
5.5.4	Error Analysis	77
5.5.5	The Rim Caustic	82
5.6	RICM Setup	84
6	Wetting and Diffusion	85
6.1	Drop Shape	86
6.2	Drop Base Radius	88
6.3	Loss of Volume Due to Diffusion	90
6.3.1	Determination of the Drop Volume	90
6.3.2	Verification of Volume Loss by Diffusion: Continuous Bleaching Experiments	91
6.3.3	Comparison of the Data to the Semi-Analytical Solution of the Diffusion Equation	92
6.3.4	Comparison of the Data to a Numerical Solution of the Diffusion Equation	94
6.4	Contact Angle	101
6.4.1	Determination of the Contact Angle	101
6.4.2	Power-law Behaviour of the Contact Angle	101
6.4.3	Long-time Behaviour: Increasing Contact Angle	105
7	Outlook	113
7.1	Including the Wetting Process into a Simulation	113
7.2	Applications in Biophysics	113

A Bio-compatibility Tests with Endothelium Cells	115
B Surface Tests	117
C The Drop Weight Method	121
D Diffusion Measurements – Continuous Bleaching	123
E Tables of Experimental Quantities	126
Bibliography	129
