

Contents

Acknowledgements	4
1 From Micro- to Nanoelectronics	5
1.1 Microelectronics	5
1.1.1 CMOS - the Basis of Current Microelectronics	5
1.1.2 The Evolution of CMOS	6
1.1.3 Where are the Limits?	7
1.2 Nanoelectronics	9
1.2.1 Physics at the Nanoscale	10
1.2.2 STM as a Universal Tool for Nanotechnology	12
1.3 Molecules as Building Blocks for Nanoelectronics	13
1.3.1 Electrical Transport through Single Molecules	13
1.4 Fabrication of a Nanodevice by Self-Assembly	19
1.5 Outline of the Thesis	21
2 Optimization of the Gold Bottom Electrode	25
2.1 Growth of Thin Films	25
2.2 Deposition of Thin Films of (111)-Oriented Gold	28
2.3 Slow Deposition of Gold on Mica	29
2.3.1 Results	29
2.3.2 Conclusion	30
2.4 Fast Deposition of Gold on Mica	31
2.4.1 Characterization by AFM	33
2.4.2 Characterization by STM	33
2.5 Conclusion	40
3 Characterization of Self-Assembled Monolayers	41
3.1 The History of SAMs of Alkanethiols on Gold	41
3.2 Experimental Details	44
3.3 SAMs Grown from Solution	46

3.3.1	Thermal Annealing of SAMs Grown From Solution	48
3.4	SAMs Grown from the Gas Phase	52
3.5	Conclusion	55
4	Self-Assembled Monolayers of Biphenylthiols	56
4.1	The Structure of SAMs of BPn	56
4.2	Experimental Details	60
4.3	Structural Characterization	61
4.3.1	Biphenylthiols with an Odd Number of Carbon Atoms – BP3 . .	61
4.3.2	Biphenylthiols with an Even Number of Carbon Atoms – BP2 and BP4	62
4.3.3	Conclusion	68
4.4	Electrical Characterization of SAMs of BPn	70
4.4.1	Current vs. Voltage Spectroscopy	70
4.4.2	Current vs. Distance Spectroscopy	73
4.4.3	Conclusion	78
5	Embedding Guest Molecules into an Alkanethiol SAM	79
5.1	Mixed Self-Assembled Monolayers as a Tool for Molecular Electronics . .	80
5.2	Experimental Details	82
5.3	Mixed SAMs of Alkanethiols and Alkanedithiols	82
5.3.1	Contacting Dithiols with Gold Nanoclusters	83
5.3.2	Electrical Characterization	85
5.4	Mixed SAMs of Alkanethiols and BPn	88
5.4.1	Embedding BP4 Molecules in a C12 SAM	88
5.4.2	Growing Domains of BP4	88
5.5	Conclusion	99
6	Resistive Switching of Rose Bengal Devices - a Molecular Effect?	101
6.1	Resistive Switching of Molecular Devices	101
6.2	Experimental Details	102
6.3	Results and Discussion	102
6.3.1	Thickness Dependence of the Switching Effect	109
6.4	Conclusion	110
7	Conclusion	111
