
Contents

1	INTRODUCTION.....	1
2	THEORY.....	3
2.1	Flow in Porous Media	5
2.2	Solute Transport.....	8
2.3	Equivalent Transport Models	10
2.3.1	Characterization of Transport Processes	10
2.3.2	Derivation of Equivalent Transport Parameters from Field Tracer Tests.....	10
3	CHARACTERIZATION OF TRANSPORT PROCESSES IN A HETEROGENEOUS AQUIFER USING NON-INVASIVE MEASUREMENT TECHNIQUES	15
3.1	Materials and Methods.....	16
3.1.1	Experiment Description	16
3.1.1.1	Hydrogeological Setup.....	16
3.1.1.2	Setup of the Test Site	17
3.1.1.3	Tracer Injection	17
3.1.1.4	Monitoring of Tracer Plume Using MLS.....	19
3.1.1.5	ERT Dataset Collection	19
3.1.2	ERT Data Set Inversion.....	20
3.1.2.1	Coordinate System for the ERT Data Set Inversion	20
3.1.2.2	Forward Modeling	22
3.1.2.3	Numerical Inversion	23
3.1.2.4	Difference Inversion	24
3.1.2.5	ERT sensitivity	25
3.1.3	Relation between Bulk EC and Tracer EC	26
3.1.4	Lab-Scale Breakthrough Experiments to Test the Conservation of the Positive and Negative Tracer Solutions	27
3.1.5	Mass Balance	28
3.1.6	Derivation of the Equivalent Parameters from ERT and MLS.....	30
3.2	Results.....	33
3.2.1	Electrode Configuration and Sensitivity.....	33

3.2.2	The Background Model.....	34
3.2.3	Derivation of Bulk Electrical Conductivity	35
3.2.4	Comparison of Bulk Electrical Conductivities	37
3.2.4.1	Comparison of Relative ERT and MLS Tracer Breakthrough.....	37
3.2.4.2	Comparison of Local Breakthrough Curves	44
3.2.4.3	Comparison of 'positive' and 'negative' Tracer Plumes	49
3.2.5	Recovered Tracer Mass	50
3.2.6	Comparison of Equivalent Transport Parameters	51
3.3	Conclusions and Discussion.....	57
4	3D NUMERICAL FLOW AND TRANSPORT SIMULATIONS BASED ON A DETERMINISTIC AQUIFER MODEL.....	59
4.1	Methods	61
4.2	Numerical Simulations	67
4.2.1	3D Numerical Flow and Transport Model TRACE/PARTRACE.....	67
4.2.2	Model Setup.....	67
4.2.2.1	Model Discretization.....	68
4.2.2.2	Parameterization for the Flow and Transport Simulations.....	71
4.2.2.3	Boundary Conditions.....	72
4.2.2.4	Tracer Injection	72
4.3	Results	75
4.3.1	Numerical Simulation Results.....	75
4.3.1.1	Homogeneous Model	75
4.3.1.2	Heterogeneous Model.....	76
4.3.1.3	Derivation of Equivalent Transport Parameters	80
4.3.2	Comparison of Simulation and Field Test.....	81
4.4	Conclusions and Discussion.....	85
5	OUTLOOK	87
	Bibliography.....	89
	Appendix.....	93
