Contents.....	1
Abstract	3
Zusammenfassung	5
Abbreviations	7
1 Introduction	11
1.1 Induced resistance	11
1.2 Signalling mechanisms	15
1.3 Chemical activators	17
1.4 Biological inducers.....	18
1.5 Barley-powdery mildew interaction.....	19
1.6 Aims	20
2 Materials and Methods	21
2.1 Biological material	21
2.1.1 Plant.....	21
2.1.2 Fungus	21
2.1.3 Bacteria.....	21
2.1.4 Plasmids.....	22
2.2 Chemicals	23
2.2.1 Primer information	23
2.3 Equipment	24
2.4 Cultivation of biological material.....	24
2.4.1 Plant material.....	24
2.4.2 Fungal material.....	25
2.4.3 Bacterial material	25
2.5 Chemical pre-treatment	25
2.6 Bacterial pre-infiltration.....	26
2.7 Fungal inoculation.....	26
2.8 Harvesting of plant material	27
2.9 Data analysis.....	27
2.10 Molecular biological methods.....	27
2.10.1 RNA isolation.....	27
2.10.2 cDNA synthesis.....	28
2.10.3 PCR amplification of cDNA probes.....	28
2.10.4 Gel extraction	29
2.10.5 Cloning and sequencing of PCR Products	29
2.10.6 DIG labelling of probes.....	31
2.10.7 Northern analysis and hybridisation.....	32
2.11 Microarray analysis	33
2.11.1 DNA array	33
2.11.2 Microarray preparation.....	34
2.11.3 Fluorescent probes.....	34
2.11.4 Hybridisation and scanning	35
2.12 In situ detection of reactive oxygen species (ROS)	36
2.13 HPLC analysis of soluble phenolics.....	37
2.14 Intercellular wash fluid (ICWF).....	37
2.15 Protein determination	37
2.16 G6PDH activity assay	38
2.17 Protein precipitation	38

Contents

2.18 SDS-PAGE.....	39
2.19 Coomassie blue staining.....	39
2.20 2D electrophoresis.....	39
2.20.1 First dimension.....	40
2.20.2 Second dimension.....	40
2.20.3 Visualisation.....	41
2.20.4 Evaluation and picking of spots.....	41
2.20.5 In-gel digest.....	41
2.20.6 Mass spectrometry analysis of the trypsin fragments.....	42
3 Results.....	43
3.1 Testing the system for systemic resistance induction.....	43
3.1.1 Chemical inducers.....	46
3.1.2 Biological inducers.....	48
3.1.3 Comparison of biological and chemical resistance inducers.....	56
3.2 Investigations of the responsible mechanisms and signalling cascades.....	60
3.2.1 Oxidative burst.....	60
3.2.2 Phenolic accumulation.....	63
3.2.3 Signal transduction.....	69
3.2.4 Chemical induced resistance.....	73
3.2.5 Pathogenesis-related proteins.....	74
3.2.6 Microarray.....	79
3.2.7 Differentially expressed proteins.....	88
3.3 Summary of important results.....	92
4 Discussion.....	95
4.1 Testing the system.....	95
4.1.1 Biological resistance induction.....	95
4.1.2 Chemical resistance induction.....	99
4.2 Systemic induced resistance: Looking for the responsible mechanisms.....	100
4.2.1 Pathogenesis-related (PR) Proteins.....	101
4.2.2 Reactive oxygen species (ROS) accumulation.....	105
4.2.3 Phenylpropanoid.....	106
4.2.4 Additional defence mechanisms.....	107
4.3 Role of signalling cascades.....	108
4.3.1 Calcium.....	109
4.3.2 ROS.....	109
4.3.3 Salicylic acid (SA).....	110
4.3.4 Jasmonate.....	111
4.3.5 Ethylene/ Polyamine.....	113
4.3.6 Additional signalling events.....	114
5 Conclusions.....	115
6 References.....	117
Acknowledgements.....	137
