Table of contents

---

1.	Introduction .....	1
2.	Aim of the studies .....	2
3.	Literature review .....	3
3.1	Fuel cells .....	3
3.1.1	Historical overview .....	3
3.1.2	Principle of operation .....	3
3.1.3	Types of fuel cells .....	4
3.1.4	Solid oxide fuel cells .....	6
	SOFC components.....	7
	Cell configuration and stack design .....	8
3.1.5	SOFC stack development at Research Centre Jülich .....	9
3.2	Basics of oxidation .....	10
3.2.1	Thermodynamics considerations.....	10
3.2.2	Kinetics of oxidation .....	13
3.3	High temperature alloys for SOFC interconnect applications .....	16
3.3.1	Requirements for SOFC interconnectors .....	16
3.3.2	Chromia formers for SOFC applications .....	17
	Cr-based alloys for SOFC application .....	19
	Commercial ferritic steels as SOFC interconnectors .....	20
	Ferritic steels designed for SOFC application.....	23
	Protective coatings for metallic SOFC interconnectors .....	25
3.4	Oxidation kinetics and lifetime prediction of the ferritic steels .....	26
3.4.1	Lifetime prediction of the alumina forming ferritic steels .....	26
3.4.2	Lifetime limits of chromia forming ferritic steels.....	29
3.5	Electrical conductivity of chromia .....	31
3.5.1	Electrical conductivity - introduction.....	31
3.5.2	Electrical conductivity of bulk chromium oxide.....	33
3.5.3	Electrical conductivity of thermally grown chromia.....	35
3.6	Summary of the literature review.....	37
4.	Experimental .....	38
4.1	Materials.....	38
4.2	Specimen preparation.....	38
4.3	Experimental procedures for oxidation testing .....	40
4.3.1	Cyclic long-term oxidation studies .....	41
4.3.2	Thermogravimetry (TG).....	42

---

---

Table of contents

---

4.3.3	Discontinuous long-term oxidation studies.....	42
4.3.4	Isothermal oxidation studies for SNMS investigations.....	42
4.3.5	Short-term isothermal / cyclic oxidation studies.....	42
4.3.6	Contact resistance experiments .....	43
4.4	Microstructural analysis .....	44
4.5	Noble metal coatings.....	45
	Results and discussion.....	46
5.	Growth mechanisms of oxide scales on ferritic steels for SOFC application .....	46
5.1	Cyclic long-term oxidation behaviour of thick components.....	46
5.1.1	Cyclic oxidation behaviour at 800°C .....	46
5.1.2	Cyclic oxidation behaviour at 900°C .....	49
5.2	Selection of the steels for further investigations .....	52
5.3	Oxidation mechanism of JS-3 / Crofer 22 APU type steels.....	52
5.3.1	Long-term oxidation behaviour.....	52
5.3.2	Early stages of oxidation of JS-3 and Crofer A .....	54
5.3.3	Effect of minor alloying additions on oxidation behaviour of Crofer type steels....	61
5.3.4	Effect of water vapour on the air oxidation behaviour of Crofer type steels .....	65
5.3.5	Optimisation of steel Crofer 22 APU (Crofer B) .....	67
5.4	Summary of differences in oxidation behaviour of high-Cr ferritic steels .....	69
6.	Oxidation induced lifetime limits of chromia forming ferritic steels.....	71
6.1	Cyclic oxidation behaviour of components with different thicknesses.....	71
6.1.1	Cyclic oxidation behaviour of selected commercial steels .....	71
	Steel Crofer A.....	71
	Steel JS-3.....	78
	Steel Crofer B.....	81
	Steel ZMG232 .....	83
6.1.2	Cyclic oxidation behaviour of selected model alloys.....	85
	Model steel FeCrLa (Mn free steel, HCE) .....	86
	Model steel FeCrMnY (high Mn concentration, HCH) .....	88
6.1.3	Oxidation rate dependence on the specimen thickness – discussion .....	90
	Depletion of chromium .....	90
	Depletion of minor alloying elements .....	91
	Internal oxidation .....	94
	Doping effect in the oxide scale.....	94
	Oxide growth and thermally induced stresses.....	95

---

---

Table of contents

---

Elongation effect .....	97
Thermal cycling effect .....	97
Effect of water vapour during the air oxidation .....	99
Effect of steel microstructure .....	101
Surface preparation .....	103
6.1.4    Summary of specimen thickness effect during cyclic oxidation.....	104
6.2    Mechanism of breakaway oxidation .....	105
6.3    Lifetime prediction of chromia forming ferritic steels.....	112
6.4    Summary of studies on oxidation limited life times .....	122
7.    Electrical conductivity of the thermally grown, chromium rich oxide scales.....	124
7.1    Prediction of the electrical conductivity of thermally grown chromia.....	128
7.2    The effect of contact paste on conductivity experiments .....	130
7.3    Summary of the studies on electrical conductivity of the thermally grown, chromium rich oxide scales .....	136
8.    Summary and conclusions.....	138
9.    References .....	141
10.    Appendix .....	152
