

Contents

1 Simple Fluids	1
1.1 New approach in the prediction of the thermal diffusion factor in associating mixtures <i>Alireza Abbasi, M. Ziad Saghir and Masahiro Kawaji</i>	3
1.2 Development of a new high pressure thermodiffusion cell <i>H. Bataller, C. Miqueu, F. Plantier, J.L. Daridon, Z. Saghir, F. Dubois and S. Van Vaerenbergh</i>	9
1.3 Thermal diffusion values for some alkane mixtures: A comparison between thermogravitational column and thermal diffusion forced Rayleigh scattering <i>P. Blanco, P. Polyakov, M. M. Bou-Ali and S. Wiegand</i>	15
1.4 Determination of the thermal diffusion coefficient in n-alkane mixtures: empirical correlations <i>P. Blanco, M. M. Bou-Ali, J. K. Platten, P. Urteaga, J. A. Madariaga and C. Santamaria</i>	23
1.5 Thermal diffusion in multicomponent mixtures: theoretical modeling and experiments <i>A. Firoozabadi</i>	29
1.6 Isotope and isomer effect in thermal diffusion of binary liquid mixtures <i>S. Hartmann, A. Königer and W. Köhler</i>	35
1.7 The theory of the thermodiffusion column with arbitrary cross-section <i>I. Hodor</i>	41
1.8 Comparison between theoretical model and experimental data of thermodiffusion coefficients for binary and ternary hydrocarbon mixtures and water-alcohol mixtures <i>T. J. Jaber, Y. Yan, A. Abbasi and M.Z. Saghir</i>	49
1.9 Study of the thermal diffusion behavior of simple and associated mixtures <i>P. Polyakov and Simone Wiegand</i>	57
1.10 Phase demixing in non-isothermal binary liquids <i>S. N. Semenov and M. E. Schimpf</i>	63
1.11 Thermogravitational technique at high pressure for liquid mixtures <i>P. Urteaga, M.M. Bou-Ali and P. Blanco</i>	71
1.12 Thermodiffusion coefficient (D_T) for binary hydrocarbon mixtures at high pressures <i>P. Urteaga, F. Plantier, M.M. Bou-Ali and H. Bataller</i>	77
1.13 Theoretical modeling and experimental measurement of thermodiffusion coefficients in binary n-alkane mixtures <i>Y. Yan, P. Blanco, M.Z. Saghir and M. Bou-Ali</i>	83

2 Polymers	89
2.1 Numerical model of unsteady flows of melt polymer in cylindrical ducts <i>K. Gueraoui, M. Taibi, S. Chtioui, Y. M. Haddad and G. Zeggwagh</i>	91
2.2 Ludwig-Soret Effect for Aqueous and Non-aqueous Solutions of Polysaccharide <i>Yuki Kishikawa, Rio Kita, Hartmut Kriegs and Simone Wiegand</i>	97
2.3 Thermodiffusion Driven Patterns in a Polymer Blend Close to the Critical Point <i>A. Krekhov, F. Schwaiger, S. Frank, A. Voit and W. Köhler</i>	103
2.4 On thermodynamic approach to mass transport <i>S. N. Semenov and M. E. Schimpf</i>	109
2.5 Theory of strong temperature dependence in thermophoresis <i>S. N. Semenov and M. E. Schimpf</i>	117
2.6 The crossover of transport properties of polymer solutions from the high polymer limit to finite chain length <i>D. Stadelmaier, T. Pollak, J. Rauch, M. Hartung and W. Köhler</i>	125
3 Complex fluids and ternary systems	131
3.1 The thermodiffusion coefficients in the ternary mixture THN-IBB-nC12 with mass fraction $c_i = 1/3$ and molar fraction $x_i = 1/3$ at 25°C <i>P. Blanco, M. M. Bou-Ali, J. K. Platten, D. Alonso de Mezquia, P. Urteaga, J.A. Madariaga and C. Santamaría</i>	133
3.2 Remarks on the analysis method for determining the mass fractions in ternary mixtures of alkanes <i>P. Blanco, M. M. Bou-Ali, J. K. Platten, D. Alonso de Mezquia and P. Urteaga</i>	141
3.3 Soret effect of nonionic surfactants in water studied by different transient grating setups <i>S. Datta, H. Ning, T. Sottmann and S. Wiegand</i>	147
3.4 Soret-driven concentration fluctuations in a chemically reacting liquid mixture <i>José M. Ortiz de Zárate, Jan V. Sengers, Dick Bedeaux and Signe Kjølstrup</i>	153
4 Convection and confinement	161
4.1 Localized steady states in binary fluid convection <i>Oriol Batiste, Isabel Mercader, Arantxa Alonso and Edgar Knobloch</i>	163
4.2 Thermoosmotic transfer of ferrocolloids through a capillary porous layer in the presence of transversal magnetic field <i>Elmars Blums, Gunars Kronkalns and Michail Maiorov</i>	169
4.3 Quasiperiodic gravitational modulation of convection in magnetic fluid <i>T. Boulal, S. Aniss and M. Belhaq</i>	175
4.4 Theoretical determination of effective thermodiffusion coefficients, application to the description of mass transfer in porous media <i>H. Davarzani, J. Chastanet, M. Marcoux and M. Quintard</i>	181
4.5 Thermal convection of binary mixes in thin channels <i>V.A. Demin and A.F. Glukhov</i>	187

4.6	Linear stability analysis of the Soret-driven monocellular flow in a horizontal porous layer subjected to vertical vibrations	197
	<i>B. Elhajar, A. Mojtabi and M. C. Charrier-Mojtabi</i>	
4.7	Diffusive mass transport under vibrations	203
	<i>Yu. Gaponenko and V. Shevtsova</i>	
4.8	Numerical modeling of two-dimensional natural convection	209
	<i>K. Gueraoui, M. Taibi, N. Dahmani, A. Mrabti, Y. M. Haddad and G. Zeggwagh</i>	
4.9	Theoretical and Numerical Model for the Lowest Layers of the Atmosphere	215
	<i>K. Gueraoui, M. Taibi, I. Aberdane, A. Dhiri, Y. M. Haddad and G. Zeggwagh</i>	
4.10	Gain of Soret separation in binary mixture due to vibrations	223
	<i>D. E. Melnikov and V.M. Shevtsova</i>	
4.11	Spatio-temporal dynamics near the onset of convection for binary mixtures in cylindrical containers	229
	<i>Isabel Mercader, Arantxa Alonso and Oriol Batiste</i>	
4.12	Marangoni convection in binary and nano-fluids in the presence of the Soret effect	235
	<i>Alla Podolny, Alex Nepomnyashchy and Alex Oron</i>	
4.13	Anomalous diffusion in porous media	243
	<i>J. Prehl, K. H. Hoffmann, M. Hofmann, G. Runger and S. Tarafdar</i>	
4.14	Stability of multicomponent convection in vertical layer with thermal diffusion	249
	<i>I. Ryzhkov and V. Shevtsova</i>	
	5 Colloids	255
5.1	Single-particle thermal diffusion of charged colloids: double-layer theory in a temperature gradient	257
	<i>J.K.G. Dhont and W.J. Briels</i>	
5.2	What Soret can learn from Seebeck	261
	<i>E. Bringuier</i>	
5.3	The Dynamics for the Soret Motion of a Charged Spherical Colloid	269
	<i>S. N. Rasuli and R. Golestanian</i>	
	6 Simulations	275
6.1	New theoretical model for thermal diffusion: Prigogine's approach revisited!	277
	<i>P.-A. Artola, B. Rousseau and G. Galliero</i>	
6.2	Molecular description: influence on thermodiffusion in non-polar simple mixtures	283
	<i>Guillaume Galliero</i>	
6.3	Non-isothermal gravitational segregation by molecular dynamics simulations	291
	<i>Guillaume Galliero and Franois Montel</i>	
6.4	Single particle thermodiffusion by molecular dynamics simulations: application to simple Lennard-Jones mixtures and nanofluids	299
	<i>Guillaume Galliero and Sebastian Volz</i>
