

TABLE OF CONTENTS

1. INTRODUCTION.....	1
2. PROPERTIES OF LIQUID HYDROGEN.....	3
2.1. Physical and Chemical Characteristics.....	3
2.1.1. Physical Properties	3
2.1.2. Chemical Properties	7
2.2. Influence of Cryogenic Hydrogen on Materials.....	9
2.3. Physiological Problems in Connection with Liquid Hydrogen.....	10
3. PRODUCTION OF LIQUID HYDROGEN AND SLUSH HYDROGEN.....	13
3.1. Liquid Hydrogen Production Methods.....	13
3.1.1. Energy Requirement.....	13
3.1.2. Linde Hampson Process	15
3.1.3. Claude Process	16
3.1.4. Magnetic Refrigeration Process	20
3.2. Safety Issues.....	21
3.3. Liquefaction Efficiency.....	22
3.4. Present Hydrogen Liquefaction Capacity in the World	22
3.5. Slush Hydrogen Production Methods.....	23
4. STORAGE OF LIQUID HYDROGEN.....	25
4.1. Principal Tank Design.....	25
4.2. LH ₂ Tanks for Mobile Applications	28
4.2.1. Passenger Car Tank Design.....	28
4.2.2. Safety Tests with LH ₂ Vehicle Tanks.....	30
4.3. Stationary LH ₂ Tanks	33
5. TRANSPORTATION OF LIQUID HYDROGEN.....	37
5.1. Road Transportation of LH ₂	37
5.2. Maritime Transportation of LH ₂	39
5.3. Rail Transportation of LH ₂	43

5.4. Aircraft Transportation of LH ₂	43
5.5. Pipeline Transportation of LH ₂	44
6. SAFETY IN HANDLING LIQUID HYDROGEN.....	47
6.1. Safety Aspects of Cryogenic Storage	47
6.2. Safety Distance.....	49
6.3. Accidental Occurrences with Liquid Hydrogen	56
6.3.1. Hydrogen Accident Statistics	57
6.3.2. Examples of Major Accidental Occurrences	60
7. APPLICATIONS OF LIQUID HYDROGEN	63
7.1. Liquid Hydrogen Use in the Industries	63
7.1.1. Chemical and Petrochemical Industries	63
7.1.2. Metal Industry	63
7.1.3. Electronic Industry	64
7.1.4. Food Industry	64
7.1.5. Glass Industry	64
7.2. Liquid Hydrogen as a Fuel	64
7.2.1. Space Rockets.....	64
7.2.2. Spaceplanes	71
7.2.3. Airplanes	75
7.2.4. Road Vehicles.....	83
7.2.5. Hydrogen Filling Stations	86
7.2.6. Fuel Cell CHP Plant Pilot Project	92
7.2.7. H ₂ /O ₂ Steam Generator.....	94
7.3. Large-Scale Projects.....	95
7.3.1. Euro-Quebec Hydro-Hydrogen Pilot Project	95
7.3.2. WE-NET Project	96
7.3.3. PORSHE Project	97
7.4. LH ₂ Applications in Science	97
7.4.1. Liquid Hydrogen in Bubble Chambers.....	97
7.4.2. Hydrogen as Cold Moderator Material.....	101

7.4.3. Heavy Water Production from Distillation of Liquid Hydrogen.....	104
8. LIQUID HYDROGEN BEHAVIOR UNDER ACCIDENTAL CONDITIONS	107
8.1. Phenomenology of Cryogenic Release.....	107
8.1.1. Accident Scenarios.....	107
8.1.2. Vaporization of Cryogenic Liquids.....	107
8.1.3. Cryogenic Pool Spreading.....	114
8.1.4. Evolution of a Flammable Vapor Cloud	116
8.1.5. LH ₂ Pool Burning.....	117
8.2. Experimental Work with Liquid Hydrogen Release	118
8.2.1. Early Liquefied Hydrogen Spill Testing	118
8.2.2. NASA LH ₂ Release Experiments.....	121
8.2.3. FZJ Tests on Liquid Hydrogen Pool Spreading	124
8.2.4. Japan Tests on Liquid Hydrogen Pool Spreading	127
8.2.5. Experimental Work on Pool Fires	128
8.3. State-of-the-Art Modeling of Cryogenic Pool Behavior	131
8.3.1. Historical Overview on Models.....	131
8.3.2. LAUV Model Description.....	132
8.3.3. Validation of the LAUV Code	134
8.4. Prediction of LH ₂ Pool Behavior in Accidental Spill Scenarios	139
8.4.1. CRYOPLANE Fuel Tank.....	139
8.4.2. Comparison of Different Cryogen Cargos of a Tank Truck.....	140
8.4.3. Simulation of Passive Catalytic Recombiner Operation in a Garage.....	143
8.5. Pool Fire Modeling.....	147
9. SUMMARY AND CONCLUSIONS.....	151
REFERENCES.....	153
APPENDIX: PHYSICAL AND CHEMICAL PROPERTIES OF HYDROGEN.....	163
