Abstract	i
Kurzfassung	iii
1 Introduction	1
1.1 Water flow in soils	2
1.2 Water flow in roots	4
1.3 Water flow between soil and root	5
1.4 Challenges in state of the art 3D root water uptake models	7
1.5 Objectives of this study	7
1.6 Thesis outline	8
2 Effect of the local soil hydraulic conductivity drop on root water uptake using a 3D plant scale model	9
2.1 Objectives	9
2.2 Introduction	9
2.3 Theory	10
2.3.1 Analytical model: water flow from bulk soil to soil-root interface	10
2.3.2 3D numerical water flow model in soil and roots: R-SWMS	12
2.3.3 Implementation of the hydraulic conductivity drop at the voxel scale	13
2.4 Methodology	14
2.4.1 Effect of the hydraulic conductivity drop in the bulk soil around a root	14
2.4.2 Effect of the hydraulic conductivity drop in a 3D soil-root water transfer model	16

2.4.3	Validation scenario: mesh refinement	17
2.5	Results	18
2.5.1	Effect of the hydraulic conductivity drop in the bulk soil around a root	18
2.5.2	Effect of the hydraulic conductivity drop in a 3D soil-root water transfer model	20
2.5.3	Validation scenario: mesh refinement	23
2.6	Conclusions	25
3	Implementation of a microscopic soil-root hydraulic conductivity drop function in a 3D soil-root water transfer model	27
3.1	Objectives	27
3.2	Introduction	27
3.3	Theory	28
3.3.1	3D macroscopic water flow model in soil and roots	28
3.3.2	Microscopic model	29
3.3.3	Water potential criterion at the soil-root interface	31
3.3.4	Estimation of the soil-root interface water potential for multiple roots in a 3D soil-root water transfer model	32
3.4	Methods	33
3.5	Results	36
3.5.1	Effect of root water uptake methods at the microscopic scale	38
3.5.2	Mass balance	41
3.6	Discussion	41
3.7	Conclusions	42
4	A grid refinement approach for a 3D soil-root water transfer model	44
4.1	Objectives	44
4.2	Introduction	44
4.3	Methods	45
4.3.1	3D macroscopic water flow model in soil and roots	45
4.3.2	<i>A priori</i> refinement	46
4.3.3	Dynamic <i>a priori</i> refinement based on active root segments	48

CONTENTS

4.3.4	<i>A posteriori</i> refinement	48
4.3.5	Simulation scenarios	49
4.4	Results and discussion	51
4.4.1	Comparison of static irregular <i>a priori</i> grids with regular grids . .	51
4.4.2	<i>A priori</i> versus <i>a posteriori</i> refinement	53
4.4.3	Dynamic <i>a priori</i> refinement based on active root segments	56
4.5	Conclusions	57
5	Synthesis	59
5.1	Conclusions	59
5.2	Perspectives	60
A	Analytical solutions for water flow from bulk soil to soil-root interface	62
B	<i>A posteriori</i> error estimate for the 3D soil water flow equation	64
