

Preface	4
1 Investments for the Expansion of Research Infrastructure	7
1.1 Physicochemical fuel cell laboratory: new methods of resolving structure activity relationships in complex multilayers	8
1.2 Component and system test facility: extensive resources for investigating the operating characteristics of components and systems for fuel processing	18
1.3 Research and development facility for new fabrication techniques: Coating and assembling under industrial conditions	22
2 Education and further training	33
2.1 University education	34
2.2 Further education and information events	38
2.3 Training documentation	42
2.4 Training facilities	43
3 Scientific and Technical Reports	45
3.1 Key topic: direct methanol fuel cells	46
3.2 Key topic: high-temperature polymer electrolyte fuel cells	73
3.3 Key topic: solid oxide fuel cells	85
3.4 Key topic: fuel processing systems	108
3.5 Interdisciplinary topic: process and systems analysis	123
3.6 Interdisciplinary topic: analysis	131
3.7 Interdisciplinary topic: quality management	140
4 Selected R&D projects	145
4.1 RuNPEM – On course for a DMFC with homogeneous media distribution	146
4.2 Contributions for increasing reliability – The SOFC in long term tests	153
4.3 The use of mineral oil products in fuel cells – The desulfurization of middle distillates	158
4.4 Zero-CO ₂ use of fossil energy carriers – Optimized process for integrating CO ₂ separation into the power plant process	166
5 Outlook for future R&D projects	179
5.1 Future R&D activities at IEF-3 within the framework of the second phase of HGF program-oriented funding	180
6 Facts and figures	197
6.1 Institute of Energy Research – Fuel Cells (IEF-3)	198

6.2	Overview of department expertise	200
6.3	Publications, technology transfer and resources	204
6.4	Committe work.....	206
6.5	Contributions to trade fairs and exhibitions	208
6.6	How to reach us.....	211
6.7	List of abbrevations	214
