

Contents

1 Neutron Sources	A. Ioffe
2 A neutron primer: Elastic scattering and the properties of the neutron	Th. Brückel
3 Correlation functions measured by scattering experiments	R. Zorn
4 Symmetry of Crystals	G. Heger
5 Applications of neutron scattering	Th. Brückel
6 Polarized neutron scattering and polarization analysis	W. Schweika
7 Structural analysis	G. Roth
8 Magnetic and lattice excitations: Inelastic neutron scattering	J. Voigt
9 Macromolecules and Self Assembly	H. Frielinghaus
10 Dynamics of Macromolecules	D. Richter
11 Correlated electrons in complex transition metal oxides	Th. Brückel
12 Surfaces, interfaces and thin films investigated by neutron reflectometry	E. Kentzinger, U. Rucker
13 Nanomagnetism	U. Rucker
