| | | |
|----------|--|-----------|
| 1 | Introduction | 1 |
| 2 | Theory | 3 |
| 2.1 | Linear beam dynamics | 3 |
| 2.1.1 | Charged particles in electro-magnetic fields | 3 |
| 2.1.2 | Co-moving coordinate system | 4 |
| 2.1.3 | Hamiltonian | 4 |
| 2.1.4 | Multipolar expansion of magnetic fields | 6 |
| 2.1.5 | Linear equation of motion and betatron functions | 7 |
| 2.1.6 | Matrix formalism | 9 |
| 2.1.7 | Dispersion and Chromaticity | 10 |
| 2.1.8 | Momentum compaction and transition energy | 11 |
| 2.1.9 | Orbit response matrix | 12 |
| 2.1.10 | Influence of electron coolers toroid magnets on closed orbit . . | 13 |
| 2.2 | Non-linear beam dynamics | 15 |
| 2.2.1 | Symplectic Maps | 15 |
| 2.2.2 | Driving terms | 16 |
| 2.2.3 | Tracking code | 18 |
| 2.2.4 | Dynamic aperture | 19 |
| 2.2.5 | KAM theorem | 20 |
| 2.2.6 | Frequency map analysis | 20 |
| 3 | The High-Energy Storage Ring HESR | 22 |
| 3.1 | Antiproton beams at FAIR | 22 |
| 3.1.1 | HESR at FAIR | 22 |
| 3.1.2 | Injection chain for antiprotons | 23 |
| 3.1.3 | PANDA experiment | 24 |
| 3.2 | HESR design | 25 |
| 3.2.1 | Layout | 25 |
| 3.2.2 | Magnets | 27 |
| 3.2.3 | Beam parameters | 29 |
| 3.2.4 | Electron cooler | 30 |
| 3.2.5 | Ion-optical properties | 32 |
| 3.3 | Comparison with COSY | 33 |

| | |
|--|-----------|
| 4 Closed orbit correction | 36 |
| 4.1 Closed orbit correction system for HESR | 36 |
| 4.1.1 Alignment errors | 36 |
| 4.1.2 Simulation of orbit distortions | 37 |
| 4.1.3 Orbit correction elements | 37 |
| 4.1.4 Closed orbit correction for HESR | 40 |
| 4.1.5 Orbit correction including field errors | 42 |
| 4.1.6 Closed local orbit bumps for HESR | 43 |
| 4.2 Closed orbit correction at COSY | 46 |
| 4.2.1 COSY settings | 46 |
| 4.2.2 Measuring an orbit response matrix | 47 |
| 4.2.3 Comparison of measured and calculated orbit response matrix | 47 |
| 4.2.4 Closed orbit correction | 47 |
| 4.3 Discussion of results | 48 |
| 5 Dynamic aperture and frequency map analysis | 51 |
| 5.1 Dynamic aperture calculations | 51 |
| 5.2 Arrangement of sextupole magnets for chromaticity correction | 52 |
| 5.3 Field errors of the HESR magnets | 53 |
| 5.4 The $\gamma_{tr} = 6.2$ lattice | 55 |
| 5.4.1 Tune scans | 55 |
| 5.4.2 Design tunes | 59 |
| 5.4.3 Optimization | 65 |
| 5.5 The $\gamma_{tr} = 13.3$ lattice | 70 |
| 5.5.1 Tune scans | 70 |
| 5.5.2 Design tunes | 72 |
| 5.5.3 Optimization | 73 |
| 5.6 Multipole correction | 74 |
| 5.7 Discussion of the results | 75 |
| 6 Summary and outlook | 77 |
