ACKNOWLEDGEMENTS	III
SUMMARY.....	V
KURZFASSUNG.....	VII
CONTENTS	XI
LIST OF TABLES.....	XV
LIST OF FIGURES.....	XVII
LIST OF ACRONYMS.....	XXI
LIST OF SYMBOLS.....	XXIII
GENERAL INTRODUCTION	1
EXPERIMENTAL SET-UP	7
LYSIMETER EXTRACTION AND PROPERTIES	9
EQUIPMENT	11
EXPERIMENTS.....	13
<i>Bare soil experiments.....</i>	13
<i>Cropped soil.....</i>	13
<i>Bare soil with remaining dead roots.....</i>	14
RESULTS.....	17
COMPARISON OF HETEROGENEOUS TRANSPORT PROCESSES OBSERVED WITH ELECTRICAL RESISTIVITY TOMOGRAPHY IN TWO SOILS	19
1. INTRODUCTION	20
2. MATERIALS AND METHODS	23
2.1 Soils.....	23
2.2 Lysimeter setup	24
2.3 Experimental design of tracer experiments.....	25
2.4 Time-lapse electrical resistivity tomography (ERT)	27
2.5 Time-domain reflectometry (TDR).....	31
2.6 Monitoring solute concentration.....	32
2.7 Inferring transport parameters	32
2.8 Different observation scales.....	34
2.9 Lateral mixing.....	35
2.10 Spatio-temporal Behaviour of solute leaching.....	36

3.	RESULTS	39
3.1	<i>3-D Distribution pore water electrical conductivity (EC_w).....</i>	39
3.2	<i>Breakthrough curves at different scales as indicators of heterogeneity and preferential flow processes.....</i>	41
3.3	<i>Characterization and quantification of heterogeneous transport.....</i>	42
4.	CONCLUSIONS.....	51
3-D ELECTRICAL RESISTIVITY TOMOGRAPHY TO MONITOR ROOT ZONE WATER DYNAMICS.....		53
1.	INTRODUCTION	54
2.	MATERIAL AND METHODS	57
2.1	<i>Experimental design of the barley experiment.....</i>	57
2.2	<i>Electrical resistivity tomography (ERT)</i>	57
2.3	<i>Conversion of bulk electrical conductivity to water content.....</i>	59
2.4	<i>Monitoring root length density</i>	60
2.5	<i>Total mass balance calculation.....</i>	61
3.	RESULTS	62
3.1	<i>In-situ calibration of ERT measurements</i>	62
3.2	<i>Water content distributions and profiles in the lysimeter</i>	64
3.3	<i>Global water mass balance analysis.....</i>	68
3.4	<i>Evolution of soil moisture variability at the voxel scale</i>	70
3.5	<i>Water depletion rate</i>	73
3.6	<i>Relationship between root length density and water depletion rate</i>	75
4.	CONCLUSIONS.....	78
PARAMETERIZING THE ROOT SYSTEM DEVELOPMENT OF SUMMER BARLEY USING MINIRHIZOTRON DATA.....		81
1.	INTRODUCTION	82
2.	MATERIALS AND METHODS	84
2.1	<i>Lysimeter and minirhizotron set-up</i>	84
2.2	<i>Root system architecture model</i>	88
2.3	<i>From root growth curves to root architecture parameters.</i>	90
2.4	<i>Multi-objective optimization</i>	93
2.5	<i>Measurement uncertainty.....</i>	94
3.	RESULTS & DISCUSSION	95
3.1	<i>Characteristics of the root system development.....</i>	95
3.2	<i>Implications of the observations</i>	99
3.3	<i>Evaluation of RootTyp simulations</i>	101
3.4	<i>Best realization</i>	104
3.5	<i>Towards a more detailed model.....</i>	106
3.6	<i>Reliability of the minirhizotron technique.....</i>	109
4.	CONCLUSIONS.....	110

5.	APPENDIX 1: ROOTTYP PARAMETERS LYSIMETER 1 (S1)	111
6.	APPENDIX 2: ROOTTYP PARAMETERS LYSIMETER 2 (S2)	112
7.	APPENDIX 3: OVERVIEW CONDUCTED SIMULATIONS AND OPTIMIZATION STRATEGY	113
	SYNTHESIS	115
1.	FINAL CONCLUSIONS	116
2.	OUTLOOK.....	117
2.1	<i>ERT</i>	117
2.2	<i>Water flow in the soil-plant continuum</i>	117
2.3	<i>Solute transport in the soil-plant continuum</i>	118
