

Contents

1	Introduction	9
2	Indications for the existence of η-mesic helium	12
2.1	Indirect	12
2.2	Direct	14
3	Nucleon momentum distributions inside d, T, ^3He and ^4He nuclei	17
4	Spectator model	21
4.1	The main assumption of the spectator model	21
4.2	Experimental proofs of spectator model	23
5	Kinematics of the η-mesic bound states production and decays	26
6	Experimental setup	31
6.1	WASA-at-COSY facility	31
6.2	COSY-TOF facility	33
7	Simulation results	35
7.1	Simulation program scheme	35
7.2	Reactions products - angular distributions	38
7.3	Acceptance	39
8	Summary and conclusions	47
A	Fermi momentum distributions-numerical data	49
B	Acceptance-supplement	53
