1	Introduction	1
1.1	Radionuclides in nuclear medicine	1
1.2	Basic principles of positron emission tomography	3
1.3	Radionuclides for labeling.....	5
1.4	Production of fluorine-18.....	7
1.5	Specific problems of reactions under no-carrier-added conditions	8
1.6	Labeling methods with fluorine-18	11
1.6.1	Electrophilic substitution.....	11
1.6.2	Nucleophilic fluorination	12
1.6.3	Radiolabeling using synthons	15
1.7	Structure of the central nervous system (CNS)	18
1.8	Ionotropic glutamate receptors	20
1.8.1	Kainate receptors.....	21
1.8.2	AMPA receptors.....	22
1.8.2.1	AMPA receptor agonists.....	22
1.8.2.2	AMPA receptor antagonists.....	23
1.8.3	NMDA receptors	23
1.8.3.1	NMDA receptor agonists.....	24
1.8.3.2	NMDA receptor antagonists.....	25
1.9	NMDA receptor ligands with amidine structure.....	27
2	Aims and scope	29
3	Results and discussion	31
3.1	Organic synthesis of precursors and fluoro-compounds.....	31
3.1.1	Synthesis of 2-hydroxybenzylamine.....	33
3.1.2	Synthesis of precursors.....	35

3.1.2.1	Synthesis of <i>N</i> -(2-hydroxybenzyl)cinnamamidin (11).....	36
3.1.2.2	Synthesis of <i>N</i> -(2-hydroxybenzyl)naphthylamidin (16) and <i>N</i> -(2-hydroxy-benzyl)benzylamidin (17)	37
3.1.2.3	Synthesis of <i>N</i> -(2-hydroxybenzyl)-isoindoline-1-imine (19).....	38
3.1.2.4	Synthesis of <i>N</i> -(2-tosyloxyethoxybenzyl)cinnamamidine (27) .	39
3.1.3	Synthesis of the authentic fluoro-compounds	41
3.1.3.1	Direct methods	41
3.1.3.2	Indirect methods.....	45
3.2	Radiosynthesis of fluorine-18 labeled compounds	51
3.2.1	Production of 1-bromo-2-[¹⁸ F]fluoroethane	52
3.2.2	Production of 2-[¹⁸ F]fluoroethyl tosylate.....	54
3.2.3	Synthesis of <i>N</i> -(2-[¹⁸ F]fluoroethoxybenzyl)-cinnamamidine.....	55
3.2.4	Synthesis of 2-(2-[¹⁸ F]fluoroethoxybenzyl)-isoindoline-1-imine.....	63
4	Experimental section	65
4.1	General	65
4.2	Synthesis of standard compounds and labeling precursors	66
4.2.1	2-Hydroxybenzylamine	66
4.2.2	General procedure for the synthesis of imidate hydrochlorides	66
4.2.2.1	Ethyl cinnamimidate hydrochloride.....	67
4.2.2.2	Ethyl 2-naphthylimidate hydrochloride	67
4.2.2.3	Ethyl phenylimidate hydrochloride	67
4.2.3	<i>N</i> -(2-Hydroxybenzyl)cinnamamidine.....	68
4.2.4	General procedure for the synthesis of <i>N</i> -(2-hydroxybenzyl)naphthyl amidine and <i>N</i> -(2-hydroxybenzyl)phenyl amidine.....	69
4.2.4.1	<i>N</i> -(2-Hydroxybenzyl) naphthyl amidine	69
4.2.4.2	<i>N</i> -(2-Hydroxybenzyl) phenyl amidine	69
4.2.5	2-Fluoroethylmesylate	69

4.2.6	2-Fluoroethoxysalicylaldehyde	70
4.2.7	2-Fluoroethoxy- α -tosyl- <i>N</i> - <i>boc</i> -benzylamine	71
4.2.8	2-Fluoroethoxy- <i>N</i> - <i>boc</i> -benzylamine	71
4.2.9	2-Fluoroethoxybenzylamine	72
4.2.10	General procedure for the synthesis of 2-fluoroethoxybenzyl amidines.....	73
4.2.10.1	<i>N</i> -(2-Fluoroethoxybenzyl)cinnamamide	73
4.2.10.2	<i>N</i> -(2-Fluoroethoxybenzyl)naphthyl amidine	74
4.2.10.3	<i>N</i> -(2-Fluoroethoxybenzyl)phenyl amidine	74
4.2.11	2-(2-Hydroxybenzyl)-isoindoline-1-imine.....	75
4.2.12	2-(2-Fluoroethoxybenzyl)-isoindoline-1-imine	75
4.3	Radiosyntheses	76
4.3.1	Radioanalysis.....	76
4.3.2	Production of n.c.a. [^{18}F]fluoride.....	77
4.3.3	Preparation of the [^{18}F]fluoride-Kryptofix complex.....	78
4.3.4	Nucleophilic substitution on 1,2-dibromoethane for production of 1-bromo-2- ^{18}F fluoroethane as prosthetic group	78
4.3.5	Nucleophilic substitution on ethylenglycole-1,2-ditosylate for production of 2- ^{18}F fluoroethyl tosylate as prosthetic group	79
4.3.6	General method of synthesis of 2- ^{18}F fluoroethoxybenzyl amidines.....	79
5	Summary.....	80
6	List of abbreviations	84
7	References.....	85
