

Contents

Chapter 1	1
Introduction.....	1
Chapter 2	7
Fundamentals	7
2.1 <i>Physical and technological background</i>	<i>8</i>
2.2 <i>Sample preparation.....</i>	<i>21</i>
2.3 <i>Material and solar cell characterization methods</i>	<i>24</i>
Chapter 3	43
Thinner absorber layers in a-Si:H/μc-Si:H tandem cells.....	43
3.1 <i>Introduction.....</i>	<i>44</i>
3.2 <i>Thin-film a-Si:H/μc-Si:H tandem cells on different TCOs</i>	<i>45</i>
3.3 <i>Performance of a-Si:H/μc-Si:H tandem cells depending on total thickness</i>	<i>51</i>
3.4 <i>Individual influence of top and bottom cell thickness</i>	<i>58</i>
3.5 <i>Thickness dependence of light-induced degradation</i>	<i>63</i>
3.6 <i>Conclusion</i>	<i>65</i>
Chapter 4	67
Optimization of very thin tandem cells	67
4.1 <i>Introduction.....</i>	<i>68</i>
4.2 <i>Amorphous silicon with high band gap</i>	<i>69</i>
4.3 <i>Single cells with high band gap a-Si:H.....</i>	<i>74</i>
4.4 <i>Variation of window-p-doped layer</i>	<i>80</i>
4.5 <i>Influence of doped layer thickness on tandem cells</i>	<i>91</i>
4.6 <i>Thin tandem cells at high deposition rate</i>	<i>96</i>
4.7 <i>Conclusion</i>	<i>102</i>
Chapter 5	105
Thin n-i-p tandem cells on different substrates.....	105

CONTENTS

5.1	<i>Introduction</i>	106
5.2	<i>Substrate preparation and characterization</i>	107
5.3	<i>Tandem cells in n-i-p configuration on different substrates</i>	113
5.4	<i>Matching behaviour for different substrates</i>	118
5.5	<i>Investigation on $\mu\text{c-Si:H}$ bottom i-layer</i>	120
5.6	<i>Bottom cells deposited at higher silane concentration</i>	128
5.7	<i>Conclusion</i>	132
Chapter 6		135
Structure analysis on $\mu\text{c-Si:H}$ by X-ray diffraction and Raman spectroscopy		135
6.1	<i>Introduction</i>	136
6.2	<i>Initial characterization of $\mu\text{c-Si:H}$ prepared with different silane concentrations</i>	137
6.3	<i>Correlation between Raman and XRD crystallinity</i>	141
6.4	<i>Hexagonal phase in $\mu\text{c-Si:H}$</i>	145
6.5	<i>Preferential orientation in $\mu\text{c-Si:H}$</i>	149
6.6	<i>Depth resolved crystallinity determination</i>	152
6.7	<i>Conclusion</i>	160
Chapter 7		163
Conclusion		163
