

# TABLE OF CONTENTS

<b>1 INTRODUCTION .....</b>	<b>2</b>
<b>1.1 Biocatalysis .....</b>	<b>2</b>
1.1.1 Biocatalysis – an ancient art.....	2
1.1.2 Biocatalysis in industry .....	3
1.1.3 Advantages and challenges of biocatalysis .....	4
<b>1.2 Chirality in industry .....</b>	<b>7</b>
1.2.1 Chiral compounds in chemical and pharmaceutical industry.....	7
1.2.2 Nomenclature of chiral centers .....	7
1.2.3 Asymmetric biocatalysis in industry .....	8
<b>1.3 Chiral resolution methods.....</b>	<b>9</b>
1.3.1 Enzyme catalyzed resolution of racemates .....	9
1.3.2 Preferential crystallization.....	10
1.3.3 Enzyme-assisted preferential crystallization.....	12
<b>1.4 α-amino acids.....</b>	<b>12</b>
1.4.1 Production methods of amino acids .....	13
1.4.2 Industrial applications of amino acids.....	14
1.4.3 Asparagine.....	15
1.4.4 Threonine and its stereoisomers .....	16
<b>1.5 Enzymes and their classification .....</b>	<b>18</b>
<b>1.6 Racemases .....</b>	<b>19</b>
1.6.1 Overview .....	19
1.6.2 Structure, function and catalytic mechanism of PLP-dependent amino acid racemases .....	20
1.6.3 Applications of amino acid racemases .....	22

<b>2 AIM OF THE THESIS .....</b>	<b>24</b>
<b>3 PUBLICATIONS .....</b>	<b>26</b>
I Enzyme-assisted physicochemical enantioseparation processes - Part I: Production and characterization of a recombinant amino acid racemase .....	26
II Enzyme-assisted physicochemical enantioseparation processes - Part II: Solid- liquid equilibria, preferential crystallization, chromatography and racemization reaction .....	34
III Enzyme-assisted physicochemical enantioseparation processes - Part III: Overcoming yield limitations by dynamic kinetic resolution of asparagine via preferential crystallization and enzymatic racemization .....	45
IV An efficient route to both enantiomers of <i>allo</i> -threonine by simultaneous amino acid catalyzed isomerization of threonine and crystallization.....	51
Corrections.....	60
<b>4 DISCUSSION.....</b>	<b>62</b>
4.1 Amino acid racemases AArac2440 and AArac12996 .....	63
4.1.1 Overexpression and secretion.....	63
4.1.2 Purification from cell extract and medium.....	64
4.1.3 Enzyme characterization .....	67
4.1.4 Structural homologies .....	71
4.1.5 Rational protein design of AArac2440 .....	72
4.2 Crystallization of amino acids .....	73
4.2.1 Conglomerates vs. racemic compounds .....	73
4.2.2 Preferential crystallization of asparagine .....	74
4.2.3 Crystallization of <i>allo</i> -threonine from diastereomeric solutions.....	76
4.3 Enzyme-assisted preferential crystallization of asparagine.....	77
4.3.1 Reactor setups .....	78
4.3.2 Process performance .....	80
4.3.3 Benefits and limits.....	82
4.4 Production of chiral <i>allo</i> -threonine .....	83
4.4.1 Identification of threonine isomers .....	83

4.4.2	Process modes .....	85
4.4.3	Benefits and limits of the new <i>allo</i> -threonine process .....	89
4.4.4	Added value by threonine isomerization.....	90
<b>5</b>	<b>CONCLUSIONS.....</b>	<b>93</b>
<b>6</b>	<b>REFERENCES.....</b>	<b>95</b>
	<b>APPENDIX.....</b>	<b>XIII</b>
