

Table of contents

Abstract	I
List of Figures	VI
List of Tables	IX
Abbreviations.....	X
Symbols	XI
Chapter 1	
Introduction and objectives of this thesis.....	- 1 -
1.1 Sulfonamides (antibiotic pharmaceuticals) in the terrestrial and aquatic environment.....	- 1 -
1.2 An important aquatic environment: Yangtze River and Three Gorges Reservoir.....	- 4 -
1.3 Research objectives and outline of this thesis	- 5 -
Chapter 2	
Theoretical background.....	- 7 -
2.1 Sulfadiazine as sorptive in aqueous solution.....	- 7 -
2.2 Surface properties of goethite.....	- 8 -
2.3 Stability of sulfadiazine in the aquatic and terrestrial environment	- 10 -
2.4 Theory of sorption	- 11 -
2.4.1 Adsorption isotherm	- 11 -
2.4.2 Sorption kinetics.....	- 14 -
2.4.3 Sorption of sulfonamides.....	- 15 -
2.4.4 Desorption Hysteresis.....	- 19 -
2.5 Ad/desorption modeling	- 20 -
2.5.1 Rate-limited sorption (RLS).....	- 20 -
2.5.2 Two-stage one-rate sorption (2S1R).....	- 21 -
2.6 Transport modeling	- 21 -
2.6.1 Deterministic Equilibrium CDE	- 22 -
2.6.2 Deterministic Nonequilibrium CDE.....	- 24 -
Chapter 3	
Materials and methods.....	- 27 -
3.1 Chemicals and Adsorbents	- 27 -

TABLE OF CONTENTS

3.1.1 Chemicals.....	- 27 -
3.1.2 Sediment/soil components.....	- 28 -
3.1.3 Sediments and Soil	- 29 -
3.2 Experimental procedures.....	- 31 -
3.2.1 Stability of SDZ in the investigated systems (minerals, sediments and soil)	- 31 -
3.2.2 Sorption batch experiments	- 33 -
3.2.3 Transport experiments	- 35 -
3.3 Analytical methods.....	- 37 -

Chapter 4

Results and discussion.....	- 41 -
4.1 Transformation of SDZ on minerals and sediments: stability, structure, mechanisms.....	- 41 -
4.1.1 Stability of SDZ solutions (in natural light and in dark)	- 42 -
4.1.2 Stability of SDZ in the presence of different sorbents	- 42 -
4.1.3 Influence of goethite concentration	- 44 -
4.1.4 Influence of contact time	- 45 -
4.1.5 Influence of redox condition	- 46 -
4.1.6 Influence of SDZ concentration on Fe-solubility in a goethite suspension	- 46 -
4.1.7 Influence of $\text{Fe}^{3+}_{\text{aq}}$ on the transformation of SDZ	- 48 -
4.1.8 Identification of SDZ transformation products: investigations with mass-spectrometry	- 48 -
4.1.8.1 Transformation product M1.....	- 50 -
4.1.8.2 Transformation product M2.....	- 50 -
4.1.8.3 Transformation product M3.....	- 53 -
4.1.9 Proposed pathways for the reaction between SDZ and goethite	- 56 -
4.1.9.1 Surface complexation of SDZ on goethite	- 56 -
4.1.9.2 Transformation pathways of SDZ to M1 and M2 on the goethite surface.....	- 59 -
4.1.9.3 Transformation pathway of SDZ to M3 on the goethite surface	- 59 -
4.2 Sorption of SDZ to minerals and organic matter (OM).....	- 61 -
4.2.1 Adsorption kinetics on Al_2O_3 and illite	- 61 -
4.2.2 Adsorption isotherms on Al_2O_3 , SiO_2 and illite.....	- 62 -
4.2.2.1 Role of surface area	- 63 -
4.2.2.2 Effect of pH	- 65 -
4.2.3 Desorption isotherms on Al_2O_3 and illite	- 67 -
4.2.4 SDZ sorption on organic matter (OM)	- 69 -
4.3 Sorption of SDZ to Yangtze sediments	- 72 -
4.3.1 Adsorption kinetics.....	- 72 -
4.3.2 Adsorption isotherms.....	- 73 -
4.3.3 Desorption isotherms.....	- 77 -
4.4 Sorption modeling with “Rate-limited sorption” and “Two-stage one-rate sorption” models	- 81 -

TABLE OF CONTENTS

4.4.1 Rate-limited sorption (RLS).....	- 81 -
4.4.2 Two-stage one-rate sorption (2S1R).....	- 85 -
4.5 Transport of SDZ in sediment columns.....	- 89 -
4.5.1 Transport of the inert tracer nitrate	- 91 -
4.5.2 Transport of SDZ.....	- 93 -
Chapter 5	
Summary.....	- 99 -
References	- 103 -
Acknowledgements.....	- 111 -
