

Contents

Abstract.....	i
Zusammenfassung	iii
Contents	v
Chapter 1. Introduction.....	1
Chapter 2. Fundamentals	7
2.1. The ISFET as label-free biosensors	7
2.1.1. ISFET: structure, operation and characteristics	7
2.1.2. The oxide-liquid interfaces	14
2.1.3. ISFET responses to biomolecular binding.....	19
2.2. Silicon nanowire (SiNW) FET biosensors	24
2.3. Nanofabrication techniques.....	29
2.3.1. Nanoimprint lithography.....	29
2.3.2. Anisotropic Si etch using TMAH	32
Chapter 3. Materials and methods	35
3.1. SiNW fabrications	35
3.1.1. Sensor designs.....	36
3.1.2. Imprint mold fabrication	38
3.1.3. Chip processing.....	40
3.2. Chip packaging and microfluidic fabrication.....	45
3.3. Measurement setup and electronic characterizations	47
3.4. Surface cleaning and modification for biomolecular binding.....	50
3.5. pH sensitivity experiments	52
3.6. Detection of Ca ²⁺ ions by SiNWs	53
3.7. Polyelectrolytes multilayer build up on SiNWs devices	54

3.8. Detection of biotin-streptavidin binding by SiNW	57
3.9. Detection of DNA by SiNWs	59
Chapter 4. Characterization of the SiNW devices.....	63
4.1. Structures and topography of the SiNW arrays	63
4.2. Electronic characterization of the SiNW arrays.....	69
4.2.1. Back-gate characteristics	69
4.2.2. Front-gate characteristics.....	76
4.2.3. Influence of the contact lines resistance effect to the SiNW arrays characteristics	85
4.2.4. Coupling of back-and front-gate.....	87
4.2.5. Signal reliability	90
4.2.6. Transfer functions of the SiNWs.....	93
4.3. Summary and discussion.....	94
Chapter 5. Applications of the SiNW arrays as biochemical sensors	97
5.1. pH sensitivity of the SiNWs	98
5.2. Detection of Ca ²⁺ ions by the SiNW devices.....	105
5.3. Potentiometric detection of poly D lysine (PDL) molecules on the SiNW devices	107
5.4. Potentiometric detection of polyelectrolytes multilayer build up on the SiNW	110
5.5. Detection of biotin-streptavidin binding by the SiNW devices	114
5.6. Detection of DNA immobilization and hybridization	117
5.7. Summary and discussion.....	125
Chapter 6. Conclusion and outlook	129
6.1. Conclusions.....	129
6.2. Outlooks.....	132
Appendices	135
A. Chip designs and fabrication process.....	135

A.1. Chips design.....	135
A.2. Fabrication process flows	139
A.3 List of equipment and chemical used in SiNW fabrication.	144
B. Chemical and buffer solutions use for biomolecular sensing.....	146
B.1. Phosphate buffer saline (PBS)	146
B.2. Phosphate buffer solution for DNA immobilization.....	146
B.3. DNA sequence	147
B.4.List of chemicals	147
C. Abbreviations.....	147
