

Contents

1. Introduction	5
2. Beam Parameters and HESR Lattice	5
3. Electric Field and Potential Well of the Antiproton Beam	11
3.1 Electric potential well	11
3.2 Transverse electric field components E_x and E_y	12
3.3 Longitudinal electric field components E_s	15
4. Residual Gas Pressure	18
5. The Ionization Process	19
5.1 Energy transfer	19
5.2 Ionization cross section	19
5.3 Ionization rate	20
5.4 Local ionization rate, neutralization rate and neutralization time	21
6. Production Time T_p, Clearing Time T_c and Neutralization η	23
6.1 Production time T_p	23
6.2 Clearing time T_c	24
6.3 Neutralization	25
7. Mean Thermal Energy and Mean Thermal Velocity	26
8. Ion Motion in Dipole, Quadrupole and Sextupole Magnets	27
8.1 Cyclotron motion of trapped ions in bending magnets	27
8.2 $\vec{E} \times \vec{B}/B^2$ cross-field drift velocity in dipole magnets	28
8.3 Estimate of the mean cross-field drift velocity in dipole magnets	30
8.4 Gradient and curvature drift velocity in quadrupole magnets	31
8.5 $\vec{E} \times \vec{B}/B^2$ cross-field drift velocity in quadrupole magnets	34
8.6 $\vec{E} \times \vec{B}/B^2$ cross-field drift velocity in sextupole magnets	35
9. Ion Motion in Solenoids	36
9.1 Cyclotron motion of trapped ions in solenoids	36
9.2 Adiabatic motion of trapped ions in the fringe field of solenoids	36
9.3 Magnetron motion and modified cyclotron motion in solenoids due to the electric field of the beam	37
9.4 Magnetron motion and modified cyclotron motion in the fringe field of solenoids	39
9.5 Fringe field of solenoids	40
9.6 Mean thermal ion drift and clearing times T_c in solenoids	40

10. Ion Clearing Using Clearing Electrodes	42
10.1 Clearing electrodes	42
10.2 Ion clearing in straight sections by mean thermal velocities	42
10.3 Ion clearing in straight sections by longitudinal acceleration	44
10.4 Ion clearing in dipole magnets by mean cross-field drift velocities	46
10.5 Ion clearing in dipole magnets by vertical electric fields	48
10.6 Ion clearing in dipole magnets by horizontal electric fields	49
10.7 UHV upgrade in dipole magnets	50
11. Local Density of Trapped Ions and Secondary Reactions	51
11.1 Transverse distribution of trapped ions	51
11.2 Estimate of trapped ion luminosity and secondary reactions	51
11.3 Comparison of primary and secondary reaction rates	52
12. Neutralization in the Arcs	53
13. Neutralization in the Full HESR Ring	56
13.1 Estimates with different assumptions	56
13.2 Discussion	56
14. Electron Cooler	66
14.1 Negative potential well of the electron beam	66
14.2 Ionization rate and neutralization due to the electron beam	67
15. Target Region	71
15.1 Problems	71
15.2 Possible solutions outside of the PANDA solenoid	71
16. Stability Condition for Ion Oscillations	73
16.1 Stability condition assuming neutralization $\eta = 0$	73
16.2 Stability condition assuming neutralization $\eta > 0$	76
17. Tune Shift and Tune Spread	77
17.1 Tune shifts due to trapped ions	77
17.2 Estimate of tune shifts	78
18. Coherent Instabilities	79
18.1 Ion oscillations	79
18.2 Formalism of coherent instabilities	93
18.3 Landau damping of coherent instabilities	96
18.4 Numerical results	96

18.5 Risk of coherent instabilities	98
18.6 Damping of instabilities using feedback systems	98
19. Beam Shaking	99
19.1 Formalism	99
19.2 Experimental observations	100
19.3 Resonant transverse shaking of the HESR beam	101
20. Beam-free Time Gap	103
20.1 Extraction of trapped ions during the beam-free time gap	103
20.2 Instability of ion oscillations	103
21. Diagnostic Tools and Measurements of Trapped Ion Effects	104
21.1 Current measurements at clearing electrode	104
21.2 Tune-shift measurements	104
21.3 Beam emittance measurements	104
21.4 Measurement of the coherent ion-beam oscillations	104
21.5 Measurements of the transverse beam transfer function	104
22. Summary and Conclusion	105
23. Appendix	107
23.1 Magnetron motion and modified cyclotron motion of trapped ions in solenoids .	107
23.2 Proof	108
23.3 Longitudinal motion of trapped ions in solenoids	109
23.4 Magnetron motion and modified cyclotron motion of electrons in solenoids . .	109
