|                                                               |           |
|---------------------------------------------------------------|-----------|
| <b>1. Introduction and motivation .....</b>                   | <b>1</b>  |
| <b>2. Fundamentals and background .....</b>                   | <b>3</b>  |
| 2.1 Membrane-based fossil fuel power plant concepts .....     | 3         |
| 2.2 Oxygen transport through mixed conducting membranes ..... | 6         |
| 2.2.1 Bulk transport.....                                     | 7         |
| 2.2.2 Surface exchange process .....                          | 9         |
| 2.3 Mixed ionic-electronic conducting materials .....         | 12        |
| 2.3.1 Perovskite structure.....                               | 12        |
| 2.3.2 Doping strategies .....                                 | 16        |
| 2.3.3 Perovskite membrane materials .....                     | 20        |
| 2.4 Asymmetric membranes .....                                | 24        |
| 2.4.1 Substrate materials .....                               | 25        |
| 2.4.2 Ni-based alloys as the substrate material .....         | 27        |
| 2.5 Coating techniques .....                                  | 30        |
| 2.5.1 Screen printing .....                                   | 30        |
| 2.5.2 Physical vapor deposition (PVD) .....                   | 31        |
| <b>3. Experimental.....</b>                                   | <b>33</b> |
| 3.1 Membrane materials synthesis .....                        | 33        |
| 3.2 Substrate materials .....                                 | 35        |
| 3.3 Layer fabrication .....                                   | 36        |
| 3.3.1 Screen printing .....                                   | 36        |
| 3.3.2 Physical vapor deposition (PVD) .....                   | 37        |
| 3.4 Characterization methods .....                            | 38        |
| 3.4.1 Chemical composition analysis .....                     | 38        |
| 3.4.2 Particle size distribution .....                        | 38        |
| 3.4.3 Dilatometry.....                                        | 38        |
| 3.4.4 X-ray diffraction (XRD).....                            | 39        |
