Stratosphere (IEK-7)

Clouds and aerosol in infrared radiative transfer calculations for the analysis of satellite observations

Sabine Grießbach

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 139

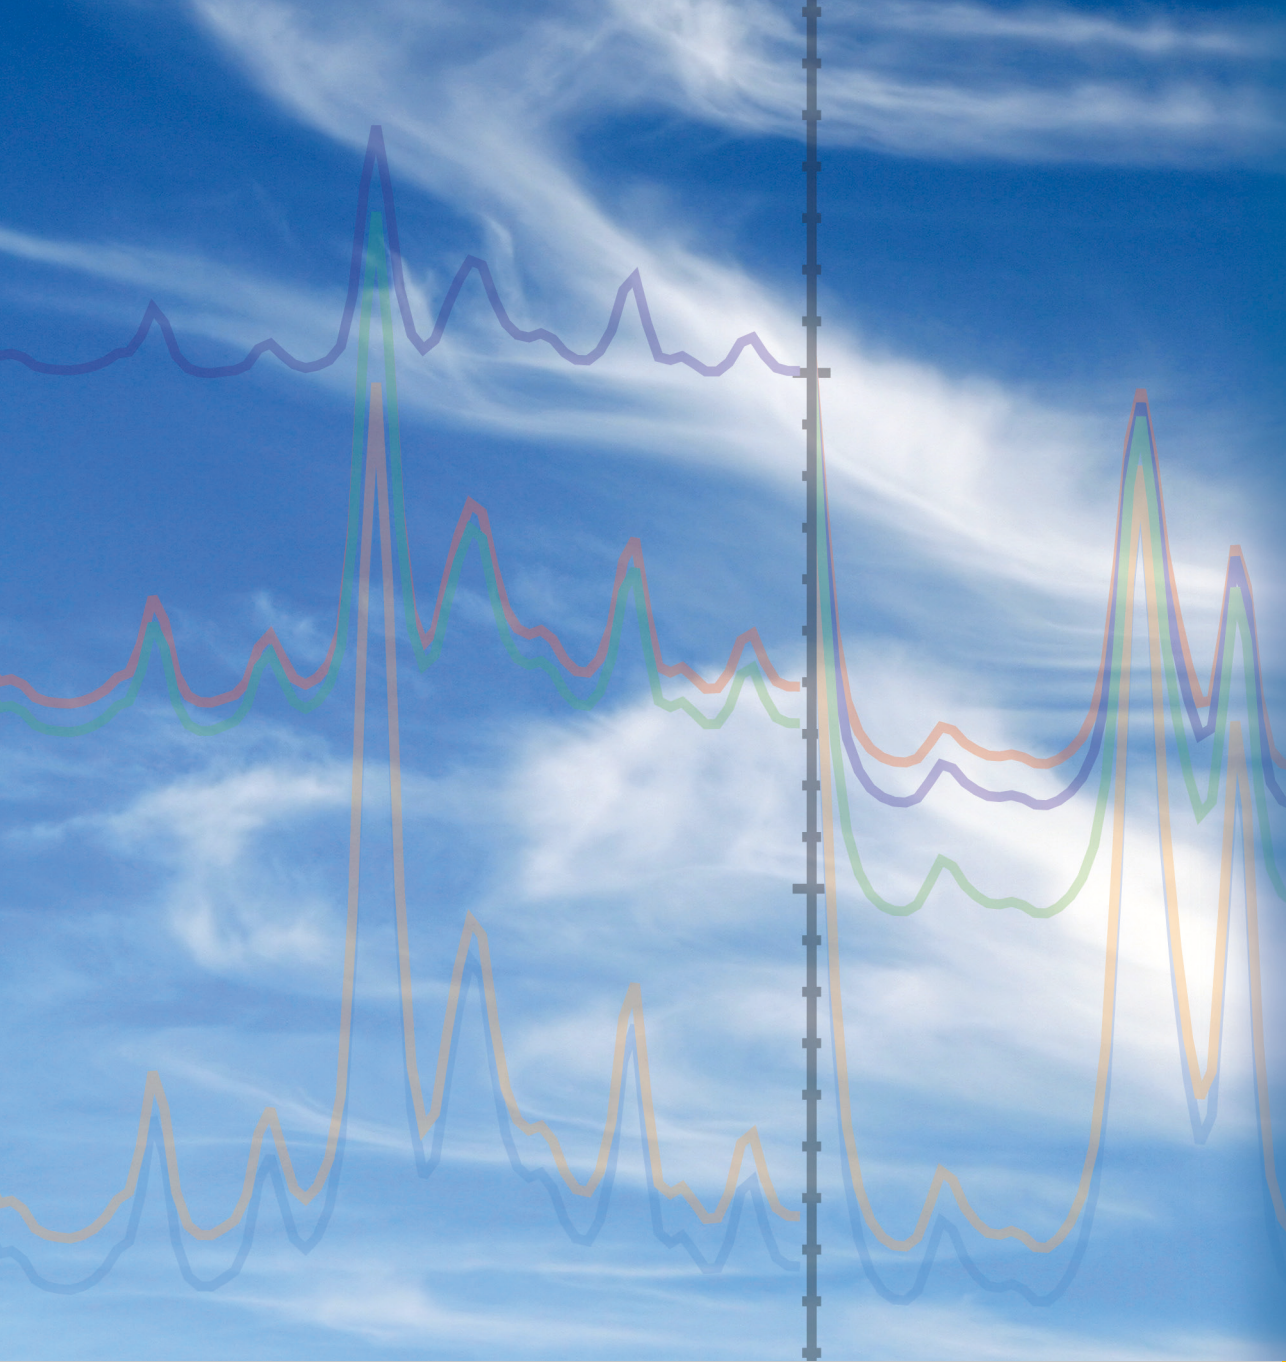

ISSN 1866-1793

ISBN 978-3-89336-785-6

Contents

1	Introduction	1
2	Aerosol and Clouds	5
2.1	Stratospheric Aerosol and Clouds	5
2.2	Tropospheric Aerosol and Clouds	7
2.3	Microphysical Properties	8
2.3.1	Size Distribution and Effective Radius	9
2.3.2	Complex Refractive Indices	12
2.3.3	Particle Shape	14
3	Scattering on Atmospheric Particles	17
3.1	Mie Theory	19
3.2	Mean Scattering Radius	21
3.3	Scattering Properties	22
3.3.1	Spherical Particles	23
3.3.2	Non-spherical Particles	35
4	Scattering in the Radiative Transfer	41
4.1	Atmospheric Radiative Transfer	41
4.1.1	Equation of Radiative Transfer	41
4.1.2	Modelling of Radiative Transfer	43
4.2	Implementation of Scattering	45
4.3	Modelled Spectra	50
5	Model Comparison	57
5.1	Comparison of Clear Air High Resolution Spectra	57
5.1.1	JURASSIC – RFM – Limb and Nadir Spectra	60
5.1.2	JURASSIC – KOPRA – Limb and Nadir Spectra	66
5.2	Comparison of Cloudy Air High Resolution Spectra	73
5.2.1	Scattering Module Demonstration	73
5.2.2	Cloud Spectra Comparison	78

6	Volcanic Ash Sensitivity Study	89
6.1	The Eyjafjallajökull Eruption	89
6.2	Volcanic Ash Detectability and Discrimination	92
6.3	Model – MIPAS Intercomparison	96
7	Summary and Conclusions	105
A	Aerosol Database	109
B	Model Comparison Spectra	117
B.1	Clear Air Comparison	118
B.1.1	JURASSIC – RFM	118
B.1.2	RFM – KOPRA	126
B.1.3	JURASSIC – KOPRA	131
B.2	Cloudy Air Comparison	139
B.2.1	JURASSIC – KOPRA - Extinction Spectra Comparison	139
B.2.2	JURASSIC – KOPRA - Scattering Spectra Comparison	148
	Bibliography	156
