## Mechanistic studies on the OH-initiated atmospheric oxidation of selected aromatic hydrocarbons

Sascha Nehr

Forschungszentrum Jülich GmbH  
Institute of Energy and Climate Research (IEK)  
Troposphere (IEK-8)

# **Mechanistic studies on the OH-initiated atmospheric oxidation of selected aromatic hydrocarbons**

Sascha Nehr

Schriften des Forschungszentrums Jülich  
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 145

---

ISSN 1866-1793

ISBN 978-3-89336-804-4

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Current state of knowledge</b>	<b>5</b>
2.1	Tropospheric photochemistry . . . . .	5
2.2	OH-initiated oxidation of monocyclic aromatics . . . . .	8
<b>3</b>	<b>LIF-based OH reactivity instrument</b>	<b>13</b>
3.1	Measurement principle . . . . .	13
3.2	Reaction volume . . . . .	17
3.3	Detection cell . . . . .	17
3.4	Photolysis laser system . . . . .	18
3.5	Probe laser system . . . . .	18
3.6	Air sampling and addition of trace gases . . . . .	19
3.7	OH and HO <sub>x</sub> decay curves . . . . .	21
3.8	Possible interferences . . . . .	24
<b>4</b>	<b>Pulsed kinetic studies</b>	<b>25</b>
4.1	Data analysis and experimental procedure . . . . .	25
4.2	Results . . . . .	29
4.2.1	HO <sub>2</sub> formation from OH + benzene and alkylbenzenes	31
4.2.2	HO <sub>2</sub> formation from OH + hydroxybenzenes . . . . .	39
4.3	Discussion . . . . .	40
4.3.1	OH + benzene . . . . .	41
4.3.2	OH + toluene and ethylbenzene . . . . .	42
4.3.3	OH + xylene isomers . . . . .	44
4.3.4	OH + trimethylbenzene isomers . . . . .	47
4.3.5	OH + hexamethylbenzene . . . . .	47
4.3.6	OH + hydroxybenzenes . . . . .	49
<b>5</b>	<b>Outdoor atmosphere simulation chamber studies</b>	<b>53</b>
5.1	Experimental procedure . . . . .	57

## CONTENTS

---

5.2	Numerical model simulations . . . . .	59
5.3	Results . . . . .	60
5.3.1	Chamber auxiliary mechanism . . . . .	61
5.3.2	Evaluation of aromatic photo-oxidation mechanisms . .	67
5.3.3	Primary phenolic oxidation product yields . . . . .	91
5.3.4	OH budgets during photo-oxidation experiments . . . .	94
5.4	Discussion . . . . .	101
5.4.1	Model-independent investigation of OH budgets . . . .	101
5.4.2	Impact of SAPHIR specific processes . . . . .	102
5.4.3	Comparison of phenol yields to literature values . . . .	104
5.4.4	Evaluation of MCMv3.2 degradation schemes . . . . .	104
<b>6</b>	<b>Summary and conclusions</b>	<b>109</b>
	<b>Appendix</b>	<b>112</b>
<b>A</b>	<b>RO<sub>2</sub> radicals involved in the photo-oxidation of aromatics</b>	<b>113</b>
<b>B</b>	<b>OH rate constants of bicyclic compounds</b>	<b>115</b>
	<b>Bibliography</b>	<b>128</b>
	<b>Acknowledgements</b>	<b>129</b>
