Coupled hydrogeophysical inversion for soil hydraulic property estimation from time-lapse geophysical data

Cho Miltin Mboh

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 154

ISSN 1866-1793

ISBN 978-3-89336-823-5

Contents

1.	General introduction	1
1.1.	Background and state of the art	1
1.2.	Problem statement.....	7
1.3.	Scientific objectives and thesis outline	7
2.	Coupled hydrogeophysical inversion of electrical resistances and inflow measurements for topsoil hydraulic properties under constant head infiltration ¹	9
2.1.	Introduction	10
2.2.	Materials and Methods.....	13
2.2.1.	<i>Measurements</i>	13
2.2.2.	<i>Forward Hydrologic Model</i>	14
2.2.3.	<i>Forward Geophysical Model</i>	15
2.2.4.	<i>Petrophysical Model</i>	16
2.2.5.	<i>Objective Functions and Optimization</i>	17
2.2.6.	<i>Numerical Experiments</i>	18
2.2.7.	<i>Multi-Step Outflow Experiment</i>	19
2.3.	Results and Discussion	19
2.3.1.	<i>Numerical Experiments</i>	19
2.3.2.	<i>Laboratory and Field Experiments</i>	20
2.6.	Conclusions.....	26
3.	Coupled hydrogeophysical inversion of streaming potential signals for unsaturated soil hydraulic properties ²	28
3.1.	Introduction.....	29
3.2.	Streaming potential theory	30
3.3.	Materials and Methods.....	32
3.3.1	<i>Laboratory experiment</i>	32
3.3.2.	<i>Coupled hydrogeophysical inversion</i>	34
3.3.3.	<i>Forward hydrologic model</i>	35
3.3.4.	<i>Forward geophysical model for streaming potentials</i>	36
3.3.5.	<i>Objective function and inversion scenarios</i>	37
3.3.6.	<i>Numerical experiments</i>	38
3.4.	Results and Discussions	38
3.5.1.	<i>Numerical Experiment</i>	38
3.5.2	<i>Laboratory experiments</i>	40
3.6.	Conclusions.....	46
4.	Feasibility of sequential and coupled inversion of TDR data to infer soil hydraulic parameters under falling head infiltration ³	48
4.1.	Introduction	49
4.2.	Materials and Methods.....	50
4.2.1	<i>TDR wave propagation model</i>	50
4.2.2.	<i>Calibration of the TDR system for inverse modeling</i>	52
4.2.3.	<i>Falling head infiltration experiment</i>	53
4.2.4.	<i>Hydrological modeling</i>	53
4.2.5	<i>General approach for inversion of data to obtain soil hydraulic properties</i>	54
4.2.6	<i>Data inversion approaches to estimate hydraulic parameters</i>	55
4.2.7.	<i>Numerical experiments</i>	57
4.3.	Results and Discussion	58
4.3.1	<i>Numerical Experiment</i>	58
4.3.2.	<i>Laboratory experiments</i>	60
4.4.	Conclusions.....	65

5.	Synthesis	66
5.1	Final conclusions	66
5.2	Outlook	67
5.2.1.	<i>Initial and boundary conditions and unrepresented processes</i>	67
5.2.2.	<i>Petrophysical parameters and spatially varying hydraulic properties</i>	67
5.2.3.	<i>Computational speed and parameter uncertainty estimation</i>	68
5.2.4.	<i>Coupled hydrogeophysical data fusion - a holistic approach to subsurface characterization</i>	68
