Ultrathin Gold Nanowires – Chemistry, Electrical Characterization and Application to Sense Cellular Biology

Alexandre Kisner

Schriften des Forschungszentrums Jülich Reihe Information / Information

CONTENTS

1.		Introduction	1
2.		Fundamentals	4
	2.1	Gold (Au): A Noble Element	4
	2.2	The Relativistic Effect on Au and the Aurophilicity Phenomenon	6
	2.2.1	Engineering new Materials from Aurophilic Interactions	9
	2.3	Synthesis of Au Nanowires	11
		Template Based Synthesis	12
		Mesoporous Templates	13
		Atomic Metal Wires from Electrochemical Etching / Deposition	14
	2.3.3	•	14
	2.3.3.1	1	15
	2.4	Electrical Transport in Metal Nanowires	19
		Electrons Tunneling in Nanowires-Metal Junctions	22
	2.5	Nanowires in Solution	23
		Nanowires-Electrolyte Interface	24
		Debye-Hückel Theory and the Electrostatic Potential at the Nanowires	25
	2.6	Coupling Metal Nanowire Devices with Biological Cells	28
	2.6.1	The Neuronal Cell	28
		The Cell Membrane and the Ionic Transport	29
	2.6.3	The Action Potential	31
	2.6.4		33
	2.6.5	The Moving Dipole Model	33
	2.6.6	Traveling Waves and Seal Resistance	34
	2.6.7	Electrode Transduction	35
	2.7	Characterization Techniques: Electron Microscope	36
	2.7.1	Transmission Electron Microscopy	36
	2.8	Objectives of the Present Work	41
3.		Experimental Methods and Procedures	42
	3.1	Chemical Synthesis of Ultrathin Au Nanowires	42
	3.1.1		43
	3.1.2	Differential Scanning Calorimetry Analysis of Intermediate Products	43
	3.1.3		43
	3.1.4	Analysis of Chemical Complex formed During the Reaction	44
	3.1.5	Synthesis of Au Nanowires Bubbling Oxygen into the Reaction	45

	3.2	Morphology and Structural Characterization of Au Nanowires	45
	3.3	Assembly and Electrical Characterization	46
		Device Fabrication for Electric Characterization of Nanowires in Air	46
	3.3.3	Assembly of Au Nanowires Current–Voltage Measurements at Room Temperature	49 49
	3.3.4	•	50
	3.4	Device Preparation for Electric Measurements of Nanowires in Solution	52
	3.4.1	Fabrication of Passivated Au Nanowire Devices	52
	3.5	Surface Modification of Au Nanowires and Electric Characterization in Solution	56
	3.5.1		56
		Surface Modification of Au Nanowire Devices with Alkanethiols	56
	3.5.2.1		57
	3.6	Device Surface Preparation and Experiments with Neuronal Cells	57
	3.6.1	1	57 58
		Cell Culturing	
	3.6.3	Immunocytochemistry Assays	59
	3.6.4	Cellular Recordings	59
	3.7	Culturing of Cardiomyocyte HL-1 Cells for investigation of Cell-substrate interaction using Focused Ion Beam	60
	3.7.1	C	61
	3.7.2	Cell Fixation	61
	3.7.3	FIB Analysis	62
4.	3.7.3	FIB Analysis Results and Discussion	
4.	3.7.3	Results and Discussion Synthesis of Ultrathin Au Nanowires	62 63
4.	4.1 4.1.1	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires	62 63 63 66
4.	4.1 4.1.1 4.2	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine	62 63 63 66 73
4.	4.1 4.1.1	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au	62 63 63 66
4.	4.1 4.1.1 4.2 4.2.1	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide	62 63 63 66 73 73
4.	4.1 4.1.1 4.2 4.2.1 4.2.2	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine	62 63 63 66 73 73
4.	4.1 4.1.1 4.2 4.2.1	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine The Mechanism of Chemical Complexing	62 63 63 66 73 73 74 76
4.	4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine	62 63 63 66 73 73
4.	4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3 4.3	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine The Mechanism of Chemical Complexing Structural Characterization The Role of Oleylamine in the Nanowires Crystal Structure Observing Nanowires over Graphene Sheets	62 63 63 66 73 73 74 76 86
4.	4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3 4.3 4.3.1 4.3.2 4.4	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine The Mechanism of Chemical Complexing Structural Characterization The Role of Oleylamine in the Nanowires Crystal Structure Observing Nanowires over Graphene Sheets Growth Mechanism of Ultrathin Au Nanowires	62 63 63 66 73 73 74 76 86 86 90 94
4.	4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3 4.3 4.3.1 4.3.2 4.4 4.4.1	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine The Mechanism of Chemical Complexing Structural Characterization The Role of Oleylamine in the Nanowires Crystal Structure Observing Nanowires over Graphene Sheets Growth Mechanism of Ultrathin Au Nanowires The Growth of Nanowires Along the Time	62 63 63 66 73 73 74 76 86 86 90 94 94
4.	4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3 4.3 4.3.1 4.3.2 4.4 4.4.1 4.4.2	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine The Mechanism of Chemical Complexing Structural Characterization The Role of Oleylamine in the Nanowires Crystal Structure Observing Nanowires over Graphene Sheets Growth Mechanism of Ultrathin Au Nanowires The Growth of Nanowires Along the Time Oxidative Etching	62 63 63 66 73 73 74 76 86 86 90 94 94 100
4.	4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3 4.3 4.3.1 4.3.2 4.4 4.4.1 4.4.2	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine The Mechanism of Chemical Complexing Structural Characterization The Role of Oleylamine in the Nanowires Crystal Structure Observing Nanowires over Graphene Sheets Growth Mechanism of Ultrathin Au Nanowires The Growth of Nanowires Along the Time Oxidative Etching Assembly, Electrical Characterization and Surface Modification	62 63 63 66 73 73 74 76 86 86 90 94 94 100 106
4.	4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3 4.3 4.3.1 4.3.2 4.4 4.4.1 4.4.2	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine The Mechanism of Chemical Complexing Structural Characterization The Role of Oleylamine in the Nanowires Crystal Structure Observing Nanowires over Graphene Sheets Growth Mechanism of Ultrathin Au Nanowires The Growth of Nanowires Along the Time Oxidative Etching	62 63 63 66 73 73 74 76 86 86 90 94 94 100
4.	4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3 4.3 4.3.1 4.3.2 4.4 4.4.1 4.4.2 4.5 4.5.1 4.5.2	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine The Mechanism of Chemical Complexing Structural Characterization The Role of Oleylamine in the Nanowires Crystal Structure Observing Nanowires over Graphene Sheets Growth Mechanism of Ultrathin Au Nanowires The Growth of Nanowires Along the Time Oxidative Etching Assembly, Electrical Characterization and Surface Modification Assembly of Au Nanowires	62 63 63 66 73 73 74 76 86 86 90 94 94 100 106 107
4.	4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3 4.3 4.3.1 4.3.2 4.4 4.4.1 4.4.2 4.5 4.5.1	Results and Discussion Synthesis of Ultrathin Au Nanowires Influence of Aurophilic Interactions in the Formation of Au Nanowires The Chemical Complexation of Au(I) Ions with Oleylamine Fundamentals of Intermediate Complex during the Synthesis of Au Nanoparticles and Nanowires using Aurous Halide The Complexation of Au(I) by Oleylamine The Mechanism of Chemical Complexing Structural Characterization The Role of Oleylamine in the Nanowires Crystal Structure Observing Nanowires over Graphene Sheets Growth Mechanism of Ultrathin Au Nanowires The Growth of Nanowires Along the Time Oxidative Etching Assembly, Electrical Characterization and Surface Modification Assembling Nanowires	62 63 63 66 73 73 74 76 86 90 94 94 100 106 106

4.5.4.1	Contact Resistance of Au Nanowires	116
4.5.5	Electric Characterization of Au Nanowires at Low Temperatures	118
4.5.6	Probing Electrical Characteristics of Au Nanowires in Solution	124
4.5.6.1	The Effect of Ionic Strength on Surface Charging of Au Nanowires	125
4.5.6.2	The Effect of Surface Modification of Au Nanowires in their Electrical	127
	Properties	
4.6	Sensing Cellular Biology	140
4.6.1	Nanowires Interacting with Cell Membrane	140
4.6.2	Neuronal Morphology	145
4.6.3	· · · · · · · · · · · · · · · · · · ·	147
5.	Conclusions and Future Directions	154
	Appendix A	157
	Appendix B	158
	Appendix C	160
	Bibliography	162
	Curriculum Vitae	171
	Acknowledgement / Danksagung	174
