Design and implementation of a highly configurable and efficient simulator for job schedulers on supercomputers

Carsten Karbach

Contents

1	Introduction	1
1.1	Problem definition	2
1.2	Outline of the thesis	4
2	Problem analysis	5
2.1	The scheduling problem	5
2.2	Current status	7
2.3	Target	21
2.4	Limitations	22
3	Job scheduling	23
3.1	Analysis of job scheduling strategies	23
3.2	Practical examples	30
4	Simulation's design	37
4.1	Overview	37
4.2	Data structures	40
4.3	Algorithms	55
4.4	Complexity	66
4.5	Data format	67
5	Optimisation	71
5.1	Similar job requests	71
5.2	Handling simultaneous events	72

5.3	Backfill windows	73
5.4	Parallelisation	76
6	Implementation aspects	83
6.1	Development environment	83
6.2	Extension points	85
7	Simulation tests	87
7.1	Module tests	87
7.2	Tests on real systems	90
7.3	Test results for JUROPA	92
8	Conclusion and outlook	95
8.1	Conclusion	95
8.2	Future work	96
	Bibliography	99
A	Detailed profiling results	103
B	Detailed test results for JUROPA	105
