Oxidation Mechanisms of Materials for Heat Exchanging Components in CO₂/H₂O-containing Gases Relevant to Oxy-fuel Environments

Tomasz Olszewski

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 159

ISSN 1866-1793

ISBN 978-3-89336-837-2

Table of contents

1. Introduction	1
1.1 Energy conversion systems with CO ₂ sequestration.....	1
1.2 Post-combustion.....	2
1.3 Pre-combustion.....	2
1.4 Oxy-fuel combustion.....	3
2. Aim of the present study	7
3. Oxidation of metallic materials	8
3.1 Thermodynamic considerations.....	8
3.2 Kinetics of oxidation.....	10
3.3 Rates of oxidation.....	13
3.3.1 Parabolic oxidation kinetics.....	13
3.3.2 Linear oxidation kinetics.....	14
3.3.3 Other reaction rate equations.....	14
3.4 Oxidation of iron.....	16
3.5 Oxidation of Fe-Cr alloys.....	17
3.6 Oxidation in water vapour.....	18
3.7 Evaporation of volatile Cr-species.....	19
3.8 Carburization in CO ₂ -containing atmospheres.....	20
4. Experimental	22
4.1 Alloy selection.....	22
4.1.1 Ferritic/martensitic steels.....	22
4.1.2 Austenitic steels.....	23
4.1.3 Ni-base alloys.....	23
4.2 Specimen preparation.....	24
4.3 Experimental set-up and oxidation testing.....	25
4.4 Gas compositions.....	26
4.5 Characterization of oxidized specimens.....	27
5. Oxidation behaviour of ferritic/martensitic steels	30
5.1 General remarks.....	30
5.2 Oxidation in air.....	32
5.3 Oxidation in Ar/H ₂ O.....	33
5.4 Oxidation in Ar/CO ₂	38
5.5 Oxidation in CO ₂ /H ₂ O.....	44
5.6 Oxidation in Ar/O ₂ /CO ₂ /H ₂ O.....	50
6. Oxidation behaviour of austenitic alloys	53
6.1 Oxidation in air.....	53
6.2 Oxidation in Ar/H ₂ O.....	55
6.3 Oxidation in Ar/CO ₂	56
6.4 Oxidation in CO ₂ /H ₂ O.....	62
6.5 Oxidation in Ar/O ₂ /CO ₂ /H ₂ O.....	65
7. Oxidation behaviour of Ni-base alloys	71

8. Oxide scale morphologies	75
8.1 Whisker formation.....	75
8.2 Wustite formation.....	83
9. Temperature dependence for oxidation of ferritic/martensitic steels	88
10. Effect of oxygen addition	96
10.1 General remarks.....	96
10.2 Effect of oxygen addition to Ar/CO ₂ on behaviour of ferritic/martensitic steels.....	96
10.3 Effect of oxygen addition to Ar/CO ₂ on behaviour of austenitic steels.....	102
10.4 Effect of oxygen addition to CO ₂ /H ₂ O on behaviour of ferritic/martensitic steels.....	105
10.5 Effect of oxygen addition to CO ₂ /H ₂ O on behaviour of austenitic steels.....	108
10.6 Summary of the results concerning oxygen addition.....	111
11. Evaporation of volatile species	113
11.1 High chromium austenitic steel.....	113
11.2 Martensitic 9-12% Cr steels.....	119
11.3 Ni-base alloys.....	120
11.4 General conclusions.....	123
12. Protective and non-protective scale formation of martensitic steels	125
12.1 Suppression of the protective scale in CO ₂ - and/or H ₂ O-rich atmospheres.....	125
12.2 Competition of reactions.....	129
13. Effect of minor alloying elements	132
13.1 General remarks.....	132
13.2 Effect of silicon.....	134
13.3 Effect of nickel.....	138
13.4 Effect of aluminum.....	139
14. Improvement of oxidation resistance by surface modification	141
14.1 General remarks.....	141
14.2 Oxidation in dry atmosphere (Ar/CO ₂).....	141
14.3 Oxidation in H ₂ O-containing atmospheres (CO ₂ /H ₂ O, Ar/O ₂ /CO ₂ /H ₂ O).....	144
15. Carburization in CO₂-containing gases	150
15.1 General remarks.....	150
15.2 Behaviour of low alloy steel 13CrMo4-4.....	150
15.3 Carburization of martensitic 9-12% Cr steels.....	152
15.4 Mechanisms of carburization.....	154
15.5 Kinetics of carburization.....	156
15.6 Effect of oxygen on carburization behaviour.....	168
15.7 Carburization of austenitic steels.....	169
16. Effect of SO₂ on oxidation and carburization behaviour of martensitic steels	172
17. Summary and conclusions	181
18. References	184
19. Appendix	192
