Coupled modeling of water, vapor and heat in unsaturated soils – Field applications and numerical studies

Christian Steenpaß

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment Band / Volume 167

ISSN 1866-1793 ISBN 978-3-89336-854-9

List of Contents

List of Contents ..... **I**

List of Figures ..... **III**

List of Tables ..... **VII**

List of Symbols ..... **VIII**

1 Introduction ..... **- 1 -**

1.1 Background and scope ..... - 1 -

1.2 Objectives ..... - 4 -

1.3 Overview ..... - 6 -

1.4 General remarks ..... - 7 -

2 Theory ..... **- 9 -**

2.1 Coupled heat and water flow ..... - 10 -

2.1.1 Water flow ..... - 10 -

2.1.2 Heat transport ..... - 12 -

2.1.3 Coupling of water flow and heat transport ..... - 13 -

2.1.4 Soil thermal and hydraulic properties ..... - 15 -

2.2 Energy balance boundary condition ..... - 18 -

2.3 Infrared thermography ..... - 20 -

3 Coupled water and heat modeling in soils ..... **- 26 -**

3.1 Introduction ..... - 26 -

3.2 Comparing coupled and non-coupled modeling ..... - 27 -

3.2.1 Reference model setup ..... - 28 -

3.2.2 Results and discussion ..... - 30 -

3.3 Water flux components in coupled heat and water modeling ..... - 33 -
3.4 Enhanced water vapor movement in soils ..... - 42 -

4 Estimation of hydraulic parameters using IR and TDR measurements ..... - 52 -
4.1 Introduction ..... - 52 -
4.2 Materials and methods ..... - 55 -
4.2.1 Model description ..... - 55 -
4.2.2 Field measurements ..... - 57 -
4.2.3 Parameterization and inverse optimization ..... - 61 -
4.3 Results and discussion ..... - 65 -
4.3.1 Synthetic data experiment ..... - 65 -
4.3.2 Field data experiment ..... - 70 -
4.4 Summary and conclusion ..... - 79 -

5 Horizontal fluxes and their influence on evaporation from heterogeneous soils ..... - 83 -
5.1 Introduction ..... - 83 -
5.2 Materials and methods ..... - 86 -
5.2.1 Surface energy balance implementation ..... - 87 -
5.2.2 Model parameterization ..... - 88 -
5.3 Results and discussion ..... - 91 -
5.3.1 Uniform and two-material soil evaporation ..... - 91 -
5.3.2 Two-material soil column: Compensated evaporation ..... - 95 -
5.4 Summary and conclusion ..... - 102 -

6 Summary and concluding remarks ..... - 105 -
6.1 Summary ..... - 105 -
6.2 Concluding remarks ..... - 108 -

References ..... - 112 -

Abstract / Kurzfassung ..... - 118 -
