Orbital-dependent exchange-correlation functionals in density-functional theory realized by the FLAPW method

Markus Betzinger

Contents

1. Introduction	1
2. Basics of density-functional theory	7
2.1. Hohenberg-Kohn theorem	10
2.2. Thomas-Fermi approach	11
2.3. Kohn-Sham system	12
2.4. Spin DFT	14
3. The exchange-correlation energy functional of KS DFT	17
3.1. Adiabatic-connection method	18
3.2. LDA and GGA	20
3.3. Uniform coordinate scaling and the adiabatic connection	21
3.4. Hybrid functionals	25
3.5. Görling-Levy perturbation theory	28
3.6. Sham-Schlüter equation	30
3.7. Summary	31
4. Electronic structure methods: the FLAPW approach	33
4.1. APW method	34
4.2. LAPW method	36
4.2.1. Local-orbital extension	38
4.2.2. Mixed product basis	41
5. Hybrid functionals within the generalized Kohn-Sham scheme	45
5.1. Generalized KS system	46
5.2. Implementation of hybrid functionals	48
5.2.1. Sparsity of the Coulomb matrix	50
5.2.2. Symmetry	52
5.2.3. Singularity of the Coulomb matrix	55
5.3. Self-consistent field cycle	57

Contents

5.4. Convergence tests	59
5.5. Results for prototype semiconductors and insulators	61
5.6. Calculation of band structures and density of states	63
5.7. EuO: a case study	68
5.8. Summary	76
6. Exact exchange within the optimized effective potential method	79
6.1. Optimized effective potential method	80
6.2. Implementation of the EXX functional	83
6.3. Balance of MPB and FLAPW basis	89
6.4. Comparison of EXX and LDA exchange potential	95
6.5. EXX KS transition energies of prototype semiconductors and insulators	98
6.6. EXX approach and the band gap problem of DFT: the III-V nitrides	101
6.7. Finite basis correction (FBC)	104
6.7.1. Derivation of the FBC	105
6.7.2. Effect of the FBC for the example of ScN	110
6.8. Perovskites: CaTiO ₃ , SrTiO ₃ , BaTiO ₃	116
6.9. Transition metal oxides: MnO, FeO, and CoO	121
6.10. Metals	128
6.10.1. EXX-OEP formalism for metals	129
6.10.2. Metals: Na, Al, and Cu	132
6.11. Summary	137
7. Summary & Conclusion	141
Appendix	
A. Incorporation of constraints in the mixed product basis	147
B. Scalar-relativistic approximation	151
List of Abbreviations	155
Bibliography	157
Acknowledgement	171
Publications	173
