Contents

List of abbreviations	vii
List of figures.....	ix
List of tables.....	xiii
Abstract	1
Zusammenfassung	3
Chapter 1: Fundamentals	5
1.1 The cell membrane.....	5
1.1.1 Cells and membranes.....	5
1.1.2 The structure of the cell membrane.....	5
1.1.3 Functions of the cell membrane.....	10
1.1.4 Membrane potential.....	11
1.1.5 Surface charge of the cell membrane.....	13
1.1.6 Electrical double layer.....	13
1.2 Physics of the lipid bilayer.....	15
1.2.1 Hydrophobic interactions.....	15
1.2.2 Lipid polymorphism.....	15
1.2.3 Lipid movements in the bilayer.....	17
1.3 Artificial lipid membrane systems.....	19
1.3.1 Lipid vesicles.....	19
1.3.2 Langmuir monolayers.....	20
1.3.3 Suspended lipid bilayers.....	21
1.3.4 Supported lipid bilayers (SLB).....	22
1.4 Cell adhesion and signalling.....	24
1.4.1 Membrane receptors.....	24
1.4.2 Signalling via adhesion molecules.....	25
1.4.3 Eph-ephrin signaling.....	26
Chapter 2: Motivation and goals	29
2.1 Interfaces in nature and technology.....	29
2.2 Why SLB?.....	30

2.2.1 Advantages of the SLB.....	30
2.2.2 Applications of the SLB.....	31
2.2.3 SLB for cell culture	31
2.3 The aim and directions of work.....	32
2.3.1 The aim.....	32
2.3.2 Increasing cell adhesion to the SLB.....	33
2.3.3 SLB with incorporated ephrin A5.....	33
2.3.4 Preparation of patterned SLB using GUV.....	34
Chapter 3: Materials and methods.....	35
3.1 Preparation of the supported lipid bilayers.....	35
3.1.1 Overview of the preparation procedure.....	35
3.1.2 Substrate preparation.....	35
3.1.3 Preparation of small unilamellar vesicles (SUV).....	36
3.1.4 Formation of supported lipid bilayers	37
3.1.5 Lipids	37
3.2 Incorporation of proteins in to SLB.....	39
3.2.1 Overview of the protein incorporation procedure.....	39
3.2.2 Determination of the concentration of detergent.....	41
3.3 Optical methods.....	42
3.3.1 Microscopy.....	42
3.3.2 Fluorescence recovery after photobleaching (FRAP).....	42
3.4 Cell culture.....	45
3.4.1 Preparation and plating of neurons.....	45
3.4.2 Preparation of poly-L-lysine coated glass.....	46
3.4.3 Cell counting and staining.....	46
3.5 QCM-D.....	48
3.6 Nanoparticle Tracking Analysis.....	51
3.7 Patch-clamp.....	52
3.8 Immunofluorescence of lipid bilayers.....	55
3.9 Preparation of GUV.....	56
3.10 Protein microcontact printing.....	57
Chapter 4: Characterization of liposomes and SLBs.....	59
4.1 Characterization of liposomes.....	59
4.2 Characterization of SLB.....	60
4.2.1 QCM-D measurements.....	60
4.2.2 Observations using fluorescent microscopy.....	62
4.2.3 FRAP.....	62
Chapter 5: Positively charged SLB for neuronal	67
5.1 Adhesion of neurons to charged SLB	67
5.1.1 Observations of neurons on charged SLB.....	67

5.1.2	Dependence of cell adhesion and growth on charge density.....	69
5.1.3	Discussion of adhesion and growth of neurons on SLBs.....	73
5.2	Electrophysiology of cells on positively charged SLB.....	75
5.3	Stability of SLB.....	77
5.3.1	Stability of SLB in solution.....	77
5.3.2	Influence of cell culture on SLB stability.....	80
Chapter 6:	SLB with incorporated ephrin A5 for neuronal cell culture.....	83
6.1	Incorporation of ephrin A5 into SLB.....	83
6.1.1	Determination of the detergent concentration.....	83
6.1.2	Immunostaining of SLB with incorporated ephrin A5.....	84
6.2	Neuronal cell culture on the ephrin A5 SLB.....	86
6.2.1	Cell growth and development.....	86
6.2.2	Synaptic activity of neurons growing on the SLB with ephrin A5	88
Chapter 7:	Patterned SLB using GUV.....	91
7.1	Characterization of GUV.....	91
7.2	Characterization of SLB on patterned substrates.....	93
7.3	Formation of patterned SLB.....	95
Chapter 8:	Discussion and conclusions.....	97
8.1	General discussion.....	97
8.2	Conclusions.....	99
8.3	Outlook.....	99
Acknowledgments.....		103
Appendix A: Materials and equipment.....		105
A.1	Materials.....	105
A.2	Equipment.....	106
Appendix B: Protocols.....		107
B.1	Preparation of small unilamellar vesicles (SUV).....	107
B.2	Glass slides cleaning for SLB preparation.....	109
B.3	Preparation of the Supported lipid bilayers (SLB) by vesicle fusion.....	110
B.4	Optical density measurements.....	110
B.5	Ephrin A5 reconstitution from detergent.....	111
B.6	Immunofluorescence of lipid bilayers.....	111
B.7	FRAP.....	112
B.8	PLL coating.....	112
B.9	Cortex preparation	112
B.10	Cell staining with calcein-AM.....	113
B.11	Preparation of GUV.....	113

B.12 Protein microcontact printing.....	114
B.13 PBS formulation.....	114
Appendix C: “Simple FRAP analyser” software.....	115
C.1 Software description.....	115
C.2 Source code.....	117
Bibliography.....	122
