ISSN 1866-1793

ISBN 978-3-89336-878-5

## Contents

1	INTRODUCTION.....	1
2	SCOPE OF THE WORK.....	4
3	LITERATURE REVIEW.....	6
3.1	Membrane materials.....	6
3.1.1	Perovskites.....	7
3.1.2	Fluorite - structured oxides.....	12
3.1.3	Fe <sub>21</sub> Cr <sub>7</sub> Al <sub>11</sub> Mo <sub>0.5</sub> Y.....	14
3.2	Mechanical characteristics.....	16
3.2.1	Elastic behavior.....	16
3.2.2	Strength, strain and reliability.....	23
3.2.3	Subcritical crack growth.....	27
3.2.4	Fracture energy criterion.....	29
3.2.5	Creep.....	31
3.2.6	Mechanical properties - porosity.....	38
3.3	Lifetime predictions.....	39
3.3.1	Stress–probability–time diagram.....	39
3.3.2	Creep rupture.....	41
3.3.3	Monkman–Grant relationship.....	42
4	EXPERIMENTAL.....	44
4.1	Material description.....	44
4.1.1	BSCF.....	44
4.1.2	LSCF.....	45
4.1.3	CGO.....	46
4.1.4	FeCrAlY alloy.....	48
4.1.5	Model material - SOFC.....	49
4.2	Characterization techniques.....	49
4.2.1	Micro-indentation.....	50
4.2.2	Bending tests.....	52
4.2.3	Compressive creep test.....	59

4.2.4	Microstructural analysis.....	60
4.3	Simulations.....	62
4.3.1	Influence of mechanical properties on stress/strain induced failure.....	62
4.3.2	Parameters influencing the stress state of the membrane structure.....	64
4.3.3	Optimal membrane design.....	66
4.3.4	Membrane layer failure - Fracture energy criterion.....	67
4.3.5	FEM - based validation of ring-on-ring bending test.....	69
5	RESULTS.....	73
5.1	Ring-on-ring test verification.....	73
5.2	Materials characterization.....	79
5.2.1	BSCF.....	80
5.2.2	LSCF.....	91
5.2.3	CGO.....	97
5.2.4	FeCrAlY.....	108
6	DISCUSSION.....	114
6.1	Correlation of microstructure and mechanical properties.....	114
6.2	Subcritical crack growth and strength – probability – time diagram.....	118
6.3	Creep deformation and rupture.....	120
6.4	Simulations.....	122
6.4.1	Influence of mechanical properties on stress/strain induced failure.....	122
6.4.2	Parameters which influence the stress state of membrane structure.....	124
6.4.3	Optimal membrane design.....	130
6.4.4	Membrane layer failure - fracture energy criterion.....	131
7	CONCLUSIONS.....	134
8	REFERENCES.....	137
