Monazite-type Ceramics for Conditioning of Minor Actinides: Structural Characterization and Properties

Carole Babelot

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 182

ISSN 1866-1793

ISBN 978-3-89336-889-1

Content

Abbreviations.....	vii
1. Introduction.....	1
2. Background.....	7
2.1. Nuclear fuel cycle.....	7
2.1.1. Spent fuel.....	8
2.2. Nuclear waste management strategies.....	9
2.2.1. Partitioning and transmutation strategy.....	9
2.2.2. Partitioning and conditioning strategy.....	11
2.3. Nuclear waste forms for the P&C strategy.....	11
2.3.1. Glasses.....	12
2.3.2. Ceramics.....	12
2.3.2.1. Aqueous durability of ceramics.....	14
2.3.2.2. Radiation tolerance of ceramics.....	15
2.4. Lanthanides and actinides chemistry.....	17
2.4.1. Lanthanide chemistry.....	17
2.4.1.1. Lanthanum chemistry.....	20
2.4.1.2. Europium chemistry.....	21
2.4.2. Actinide chemistry.....	21
2.5. Spectroscopic methods.....	23
2.5.1. Time resolved laser fluorescence spectroscopy.....	23
2.5.1.1. Difference between fluorescence and phosphorescence.....	23
2.5.1.2. Elements with fluorescence ability.....	25
2.5.1.3. Fluorescence lifetime.....	30
2.6. Monazite.....	32
2.6.1. Structure, composition and occurrence.....	32
2.6.2. Monazite versus xenotime.....	35
2.6.3. Synthesis methods.....	35
2.6.4. Monazite as a host phase for actinides.....	36
3. Experimental part.....	39
3.1. Chemicals, methods and apparatuses.....	39
3.1.1. Chemicals.....	39
3.1.2. Synthesis of monazite-type powder.....	39
3.1.3. Pressing and sintering of $REPO_4$ pellets.....	41
3.1.4. Physical properties of pellets.....	41
3.1.4.1. Density measurements.....	41
3.1.4.2. Vickers microhardness and fracture toughness.....	42
3.1.5. Thermogravimetry coupled with differential scanning calorimetry.....	43
3.1.6. Powder X-ray diffraction analysis.....	43
3.1.7. Raman spectroscopy.....	44
3.1.8. Scanning electron microscope.....	44
3.1.9. Specific surface area measurements.....	45
3.1.10. Dilatometer.....	45
3.1.11. Inductive coupled plasma mass spectrometry.....	45

3.1.12. Aqueous durability tests.....	46
3.1.13. Radiation tolerance tests by ion implantation.....	48
3.1.14. Time resolved laser fluorescence spectroscopy.....	49
3.1.15. Extended X-ray absorption fine structure.....	50
4. Results and discussion.....	53
4.1. Characterization of monazite-type powder.....	53
4.1.1. Thermal behavior of La-monazite-type powder by means of TG-DSC measurements.....	53
4.1.2. Structure analysis of monazite-type powder by means of X-ray diffraction..	56
4.1.2.1. Structure analysis of La-monazite-type powder sintered at 1300 °C	57
4.1.2.2. Effects of a thermal treatment on La-monazite samples.....	59
4.1.2.3. Effect of a dopant incorporated in the La-monazite crystal structure.....	65
4.1.3. Time resolved laser fluorescence spectroscopy.....	69
4.1.3.1. TRLFS measurements on Eu-doped LaPO ₄ powder	69
4.1.3.2. TRLFS measurements on Cm-doped LaPO ₄ powder	74
4.1.4. Extended X-ray absorption fine structure	78
4.1.4.1. Fit of the Fourier transformation of L ₃ -edge k^3 -weighted EXAFS spectra	78
4.1.4.2. Interpretation of the results	79
4.2. Characterization of monazite-type pellets	81
4.2.1. Sintering process.....	81
4.2.2. Microstructure study of La-monazite pellet by means of SEM.....	81
4.2.3. Optimization of the density of the pellets depending on the calcination temperature	82
4.2.4. Vickers microhardness and fracture toughness of La-monazite	87
4.2.5. Dilatometric measurements on La-monazite calcined at different temperatures	88
4.3. Resistance to corrosion and to irradiation of monazite-type samples.....	92
4.3.1. Aqueous durability tests on monazite-type samples.....	92
4.3.1.1. Normalized weight loss and normalized dissolution rate of La in La-monazite	92
4.3.1.2. Normalized dissolution rate of La and Eu in Eu-doped La-monazite	96
4.3.1.3. Comparison with the literature.....	97
4.3.2. Radiation tolerance tests on La-monazite pellets by means of ion implantation	100
4.3.2.1. Raman spectroscopy of La-monazite pellets before ion implantation...	100
4.3.2.2. Raman spectroscopy of La-monazite pellets after Kr ²⁺ implantation....	102
5. Conclusion and outlook	105
References.....	111
Publications and presentations of this work.....	121
Acknowledgements.....	123
Extended abstract	125
Zusammenfassung.....	127
