ISBN 978-3-89336-934-8

# Contents

<b>1. Introduction</b>	<b>9</b>
<b>2. Density functional theory</b>	<b>15</b>
<b>3. Green functions</b>	<b>21</b>
3.1. Green function in physics . . . . .	21
3.2. Representation of the KKR Green function . . . . .	26
3.3. Expansion of the single-site Green function . . . . .	28
3.4. Multiple scattering theory . . . . .	33
3.5. Angular momentum cut-off . . . . .	37
<b>4. Single site problem in KKR</b>	<b>41</b>
4.1. Schrödinger equation . . . . .	41
4.2. Dirac equation . . . . .	53
4.3. Scalar-relativistic approximation . . . . .	54
4.4. Spin-orbit coupling . . . . .	70
<b>5. Numerical methods</b>	<b>75</b>
5.1. State of the art solver . . . . .	75
5.2. Direct inversion . . . . .	77
5.2.1. Subinterval technique . . . . .	78
5.2.2. Chebyshev polynomials . . . . .	82
5.2.3. Discretization of the Lippmann-Schwinger equation . . . . .	90
<b>6. Improvements to KKR</b>	<b>95</b>
6.1. Impurity calculations . . . . .	95
6.1.1. Host Green function . . . . .	95
6.1.2. Impurity Green function . . . . .	96
6.2. Structural relaxations . . . . .	99
6.2.1. U-transformation . . . . .	100
6.2.2. Concept of virtual atoms . . . . .	101
6.3. Non-collinear magnetism . . . . .	108
6.3.1. Density . . . . .	112
6.3.2. Magnetic model Hamiltonian . . . . .	116
6.3.3. Model parameters by infinitesimal rotations . . . . .	119

---

<b>7. Atomistic spin-dynamics</b>	<b>125</b>
<b>8. Applications</b>	<b>131</b>
8.1. Monolayer Fe on Ir(111) . . . . .	131
8.2. Nano-islands of 7 Fe atoms on Ir(111) . . . . .	142
8.2.1. Unrelaxed atomic positions . . . . .	143
8.2.2. Relaxed atomic positions . . . . .	149
8.3. 19 Fe nano-island on Ir(111) . . . . .	152
8.3.1. Unrelaxed atomic positions . . . . .	153
8.3.2. Relaxed atomic positions . . . . .	158
<b>9. Summary and Outlook</b>	<b>167</b>
<b>A. Details on model parameters by infinitesimal rotations</b>	<b>173</b>
<b>B. Numerical treatment</b>	<b>175</b>
