ISSN 1866-1793

ISBN 978-3-89336-935-5

## Table of contents

1. Introduction.....	1
2. Literature review .....	3
2.1 Fuel cells .....	3
2.2 History of fuel cells.....	3
2.3 Principle of a fuel cell.....	4
2.4 Types of fuel cells .....	4
2.5 Solid oxide fuel cells (SOFCs) .....	5
2.6 SOFC - Technology features .....	6
2.6.1 Cell configuration .....	6
2.6.2 Stack design .....	6
2.7 Materials .....	7
2.7.1 Electrolyte .....	7
2.7.2 Cathode .....	8
2.7.3 Anode .....	8
2.7.4 Interconnect.....	9
2.8 Requirements for interconnect materials .....	9
2.9 Fundamentals of oxidation.....	10
2.9.1 Basic thermodynamics .....	10
2.9.2 Oxidation kinetics .....	12
2.10 Metallic materials for interconnects.....	16
2.11 Electrical conductivity of chromia-based oxide scales .....	18
2.12 Ferritic steels .....	20
2.13 Ferritic steels especially designed for SOFC applications.....	23
2.14 Effect of component thickness on oxidation behavior.....	27
2.15 Ferritic steels with increased creep strength .....	28
2.15.1 Fundamentals of creep .....	28
2.15.2 Laves phase strengthened ferritic steel .....	30
3. Aims of the present study .....	33
4. Experimental details.....	34
4.1 Materials .....	34
4.2 Specimen preparation.....	38
4.3 Oxidation tests .....	38
4.3.1 Discontinuous oxidation tests .....	39
4.3.2 Cyclic oxidation test .....	39
4.3.3 Thermogravimetry (TG) .....	39
4.4 Characterization of oxidized specimens .....	39
4.4.1 Optical metallography and electron microscopy .....	39
4.4.2 X-ray diffraction analysis .....	40
4.4.3 Plasma - SNMS analysis .....	40
4.4.4 GDOES analysis .....	40
4.5 Electrical conductivity tests .....	41
5. Crofer 22 H .....	42

5.1 Time and temperature dependent changes of Laves phase strengthened steel microstructures.....	42
5.1.1 Introductory remarks.....	42
5.1.2 Microstructure of laboratory batch of Crofer 22 H.....	43
5.1.3 Microstructure of laves phase containing model steel.....	49
5.1.4 Microstructure of commercial steel Crofer 22 H.....	52
5.2 Oxidation behaviour of Crofer 22 H.....	54
5.2.1 Temperature dependence of oxidation behaviour.....	54
5.2.2 Scale formation in air.....	57
5.2.3 Scale formation in Ar-H <sub>2</sub> -H <sub>2</sub> O.....	67
5.2.4 Mechanisms of spinel formation.....	77
5.3 Oxidation induced phase changes in the subsurface depletion zone .....	80
5.3.1 General remarks .....	80
5.3.2 Experimental details.....	81
5.3.3 Subsurface phase transformations during oxidation of Crofer 22 H .....	82
5.3.4 Time dependence of subscale phase transformations .....	85
5.3.5 Subsurface phase transformations during oxidation of Mn-free steel in simulated anode gas .....	96
5.3.6 Mechanisms of subsurface enrichment/depletion .....	104
5.3.6.1 Modeling of subsurface depletion/enrichment as a result of Cr depletion .	104
5.3.6.2 Preferential nucleation at steel/oxide interface .....	109
5.4 Significance of Mn for oxide scale properties .....	112
5.4.1 Introductory remarks.....	112
5.4.2 Oxidation behaviour at 800°C .....	113
5.5 Effect of specimen thickness on the oxidation behaviour of Laves phase strengthened ferritic steel.....	127
5.5.1 General remarks.....	127
5.5.2 Experimental details.....	128
5.5.3 Mechanisms for specimen thickness dependence on oxidation rates .....	131
5.5.4 Effect of pre-ageing on specimen thickness dependence of oxidation rates .	144
5.6 Microstructure and oxidation behavior of niobium-free steels.....	158
5.6.1 Background of the investigations.....	158
5.6.2 Microstructure of W containing Nb-free steels .....	161
5.6.3 Oxidation behaviour: steels without Si addition.....	165
5.6.4 Oxidation behaviour: W containing steels with Si addition .....	171
5.6.5 Specimen thickness dependence of the oxidation rate for Nb-free steels.....	176
5.6.6 Oxidation behaviour of Nb-free steels in simulated anode gas .....	184
5.6.7 Summary of behaviour of Nb-free, W-containing steels .....	186
5.7 Contact resistance of oxidized interconnect steels.....	188
5.7.1 General comments .....	188
5.7.2 Contact resistance of the Crofer 22 H type ferritic steels .....	190
6. Conclusions.....	195
7. References.....	200
