ISSN 1866-1807

ISBN 978-3-89336-962-1

# Contents

<b>Abstract</b>	<b>1</b>
<b>Zusammenfassung</b>	<b>3</b>
<b>Conventions</b>	<b>9</b>
<b>1 Introduction</b>	<b>11</b>
1.1 Ultrafast optical manipulation of magnetic order . . . . .	11
1.2 Ultrafast optical control of spin based qubits . . . . .	18
1.3 Scope of the thesis . . . . .	25
<b>2 The theory of the inverse Faraday effect</b>	<b>27</b>
2.1 The phenomenological theory of the inverse Faraday effect . . . . .	27
2.2 Quantum mechanical description at long time scales . . . . .	31
2.3 The theory of the inverse Faraday effect at subpicosecond time scales . . . . .	34
2.3.1 The stationary and ultrafast inverse Faraday effect . . . . .	34
2.3.2 Effective Hamiltonian . . . . .	36
2.3.3 Induced magnetization . . . . .	40
2.4 The IFE-1 and IFE-2 processes . . . . .	45
<b>3 Mechanism of the ultrafast IFE due to the spin-orbit coupling</b>	<b>47</b>
3.1 Introduction . . . . .	47
3.2 Magnetization via the stimulated Raman scattering process . . . . .	49
3.2.1 The action of a laser field on an electronic system . . . . .	49
3.2.2 Laser induced magnetization . . . . .	50
3.2.3 Spin-orbit coupling . . . . .	51
3.3 Single spin system excited by polarized laser light . . . . .	52
3.3.1 The second order wave function . . . . .	53
3.3.2 The probability of the spin-flip and induced magnetization	55

3.3.3	The influence of the Raman scattering process on the spin orientation . . . . .	61
3.4	Laser-induced magnetization dynamics in isolated atoms . . . . .	64
3.5	Conclusions . . . . .	69
<b>4</b>	<b>The ultrafast IFE described by a momentum operator</b>	<b>71</b>
4.1	Determination of the momentum operator . . . . .	72
4.1.1	The case of zero ground state splitting . . . . .	73
4.1.2	General equations . . . . .	76
4.2	Equations of motion . . . . .	78
4.3	Examples . . . . .	79
4.3.1	Equations of motion of a single spin in an external magnetic field . . . . .	79
4.3.2	Equations of motion of magnetic momentum with $J = 3/2$ .	80
<b>5</b>	<b>Larmor precession triggered by the ultrafast IFE</b>	<b>85</b>
5.1	Single spin in an external magnetic field . . . . .	86
5.2	Spin equations of motion . . . . .	87
5.3	Time evolution of the spin vector . . . . .	88
5.4	Spectral dependence . . . . .	92
5.5	Conclusions . . . . .	97
<b>6</b>	<b>Modeling of the IFE in magnetic crystals</b>	<b>99</b>
6.1	Crystal field and spin-orbit coupling . . . . .	100
6.1.1	Crystal field . . . . .	100
6.1.2	Effect of the crystal field on the IFE . . . . .	102
6.2	Dynamics of the antiferromagnet due to the IFE . . . . .	106
6.2.1	Ground and excited states of two antiferromagnetically coupled sub-lattices . . . . .	107
6.2.2	Equations of motion . . . . .	110
6.2.3	Results . . . . .	115
<b>7</b>	<b>Conclusions and Outlook</b>	<b>121</b>
<b>A</b>	<b>The solution of the time-dependent Schrödinger equation</b>	<b>125</b>
A.1	The solution of the time-dependent Schrödinger equation by iterations . . . . .	125
A.2	Excitation by light . . . . .	126
A.3	The solutions for particular cases . . . . .	128
A.3.1	For Gaussian-shaped laser pulses . . . . .	129

## Contents

---

A.3.2 For rectangular shaped laser pulses . . . . .	130
<b>B Laser pulse characteristics</b>	<b>133</b>
B.1 Gaussian pulse . . . . .	134
B.2 Rectangular pulse . . . . .	134
B.3 Triangular pulse . . . . .	135
<b>C Single spin</b>	<b>137</b>
C.1 The calculation of the second order wave function in the hydrogen atom-like system . . . . .	137
C.2 The effect of linear polarized light . . . . .	141
C.3 Spin-orbit coupling and an external field . . . . .	141
C.3.1 Spin-orbit coupling and Zeeman interaction . . . . .	141
C.3.2 Spin-orbit coupling and crystal field . . . . .	143
<b>D Momentum operator</b>	<b>147</b>
D.1 The operator in case $\mathcal{U} = \mathbf{1}$ . . . . .	148
D.2 The general form of the operator . . . . .	151
D.3 Commutator with the momentum operator . . . . .	152
<b>E Dynamics of an easy plane antiferromagnet</b>	<b>155</b>
E.1 Ground and excited states . . . . .	155
E.2 Time evolution due to the IFE . . . . .	158
E.3 Equations of motion . . . . .	160
E.3.1 Functions $\nu_a$ and $\gamma_a$ . . . . .	165
E.4 Results . . . . .	166
E.4.1 Zero crystal field . . . . .	166
E.4.2 Zero exchange interaction . . . . .	167
<b>Bibliography</b>	<b>170</b>
<b>Acknowledgments</b>	<b>183</b>
